- ☒ New products

Thank you for choosing Anlan. We look forward to working with you to improve our quality and service.

Safety Precautions

Please read the document content carefully to make sure you understand all information.

Please be sure to comply with this precautions to prevent users and others from being injured or property loss.

Danger

Indicates that incorrect handling may result in death or serious injury to the user.

Warning

Indicates that incorrect operation may result in minor injury to the user or property damage.

Danger

Do not use the following medical electrical equipment with this device together:

- Implantable medical electronic devices such as pacemakers
- Medical electronic devices for life-threatening items such as heart-lung machines
- Wearable medical electronic devices such as electrocardiographs

Prohibit

Do not use this product if you are in such situation :

- Receiving treatment from a doctor.
- During pregnancy (can use at least 6 months after childbirth, please consult a doctor before use.)
- Menstrual period, lactation
- Minors, and people who cannot express their thoughts clearly.
- People with cancer, epilepsy or other functional disabilities
- People with blood diseases, infectious diseases, hypertension, malignant tumors, visceral diseases, acute diseases, tuberculosis, and fever.
- People with allergies, sensitive, fragile skin, atopic dermatitis, and skin problems.
- People with skin diseases or heat allergies
- People who have developed lesions due to physical stimulation, etc.

- Do not use this product near equipment that emits short waves or microwaves.
 - People who are undergoing dental treatment or fillings may experience tooth discomfort due to EMS irritation. Please lower the level and adjust the area you want to use.
- ※ The above situations may cause accidents or malfunctions.

Note

Do not use it in the following cases:

- If you are extremely fatigued or in poor physical condition.
- While taking steroid hormones, immunosuppression, or drugs that cause drowsiness.
- Areas where the skin has acne, cuts, bulging moles, viral warts, or areas where the skin is suppurated and inflamed.
- Areas where the skin is irritated and abnormal due to excessive sunburn.
- Areas where hair is being removed or removed on the day of use.
- If you have undergone facial surgery (plastic surgery, cosmetic surgery, etc.).

※ The above may cause accidents or trouble.

Warning

※ If you are unsure, please consult your doctor beforehand to ensure that the beauty device can be used, and if you have any questions, please contact service. For detailed usage precautions, the contents listed in the instruction manual take precedence.

Specifications

Product Name	ANLAN Shining V Face Device
Model Number	01-AVLY41-02A
Size	About 170x52x60mm
Weight	About 142g
Material	Main body: ABS Band: Polyester
Mode Timer	About 15 Mins
Wavelength	Red Light 620-625nm, Blue Light 460-480nm
Vibration	8600 rpm $\pm$ 10%
Temperature	42 $\pm$ 3°C
Charging Type	Type-C Port
Battery	Main Unit: 850MAH, Remote Controller: 150MAH
Working Time	About 90 Mins
Charging Time	About 3hours
Input	DC5V $\overline{\text{---}}$ 2A
Power	5W
Warranty	1 Year

Pack List

Product Introduction

Charging Introduction

Remote Controller	• When the controller is low battery , the battery icon on screen will show only one bar, flash 10 times, and then turn off automatically. • While the controller is charging, the white indicator light will flash (please turn off the power and do not use this product while charging). • If controller is fully charged, power indicator light stays white. (After fully charging, please unplug the battery to avoid charging it for a long time. If you continue to charge it, the battery life will be shortened.)
Main Machine	• When machine is low battery, the red power indicator will flash 10 times and then the power will turn off automatically. • While the product is being charged, the red power indicator light will flash. (Please turn off the power and do not use this product while charging) • If the product is fully charged, the power indicator light will always light up in blue. (After fully charging, please unplug machine to avoid charging it for a long time. If you continue to charge it, the battery life will be shortened.)

Please note:

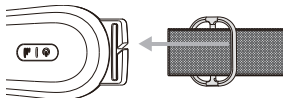

- If there are any water droplets on the controller or charging port, wipe them thoroughly to prevent malfunction.
- When charging for the first time after purchase, please use it after battery is fully charged.
- When using the product for the first time or after not using it for a long period of time, battery bar indicates power not precisely. Even if it shows full battery bar the power may not last so long. In that case, please charge it again before using it.
- Please use the included Type-C charging cable.
- Fast charging and iPhone AC chargers are not supported.

About Installing And Wearing Device

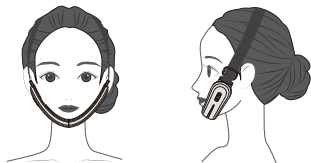

1. After removing your makeup and washing your face, moisturize skin thoroughly with your own gel or serum before use.

2. Please install the belt before use.

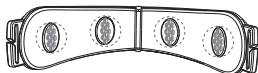

3. Loosen the belt first to put device on face and then adjust the belt to make it suitable for your head

4. Adjust device to make all electrode pads to touch your skin thoroughly

※ You can place extra gel on four electrode pads of this product to strengthen conductive function.

Note

1. If there is no conductive material between the skin and the electrode pads, the EMS transmission will be insufficient and the feeling will be weak. To ensure smooth use, we recommend moisturizing your face with moisturizing products such as lotion and gel after washing your face.
(To prevent the plastic part of the product from deteriorating, please do not use oily cosmetics such as beauty oil)
2. Check whether the left and right electrode pads (top two electrodes, bottom two electrodes) are in full contact with the skin.
If only one electrode piece is in contact, no current loop will be formed, EMS conduction cannot occur, and there will be no feeling.
3. Do not apply excessive force during installation. This may cause damage to the silicone mask.
4. Do not press any buttons on the controller during installation.
5. Install the controller with the power turned off.

About Modes Operation

※ This product has 4 modes (massage mode/kneading mode/acupuncture mode/tapping mode). The heating/vibration/red and blue light functions can be controlled on and off independently using the remote control.

Main Machine Operation

1. **Power/Mode**

Press power button for about 2 seconds to turn on machine.
After powering on, press power button to switch modes.

2. **Level/ Heat Button**

Short press the level button to switch levels
Long press level button to turn on/off the heating function.

※ **Note:** If you lose the controller, you can only adjust Mode/EMS Level/Heat with button on machine. Vibration and light cannot be adjusted.

Remote Controller Operation

1. (Power/Light Button)

Long press power button for about 2 seconds to turn on remote controller. After power on, press this button to switch red light→ blue light→ no light.

2. (Level Button)

Short press "+" and "-" buttons to switch level intensity. Level intensity ranges from level 0 (lowest) to level 9 (highest).

※Note

- Please try from lowest level the first time you use it, until you get used then you can level up.
- If your skin becomes dry during use, please reapply lotion, essence, gel, etc. appropriately.
- Don't try a level you can't tolerate, as it may cause uncomfortable stinging before your skin gets used to EMS.

3. (EMS Mode Button)

Press mode button to switch between 4 modes: massage mode, kneading mode, acupuncture mode, and tapping mode.

4. (Heat/Vibration Button)

Short press heat/vibration button for 1 second to turn on/off the vibration function.

Long press heat/vibration button for 2 seconds to turn on/off the heating function.

※ Note:

- When using the product for the first time, you need to long press power button of the main machine to turn it on before you can use remote controller to control it. After the product is shut down, you can use the controller to start product directly within 3 minutes. If it

exceeds 3 minutes, you will need to press button on machine again to turn it on.

- It's recommended use it approximately once or twice a day.
- 15-minute smart timer, whether you use only one mode or change multiple modes midway, it will automatically shut down after 15 minutes of continuous use after turning it on. If you need to continue using it, please turn it on again.
- Please pay attention to the condition of your skin when using it. If skin abnormalities occur, please stop use immediately and consult a doctor.
- If you want to use it multiple times on the same day, it is recommended to leave it at least 5 hours apart

Cleaning And Storage Precautions

- Please turn off the machine in time after use. If any lotion, essence, or gel remains on the machine, please clean it in time.
- Be sure to turn off the power when cleaning to avoid electric shock, short circuit or fire.
- This product is not waterproof, please do not wash it with water to avoid machine damage and functional failure.
- Wipe away dirt with a soft cloth dampened in water and wrung out. If the dirt does not come off, wipe it gently with a cloth dampened with dilute neutral detergent.
- Do not use alkaline detergents, alcohol, thinner, gasoline, nail polish remover, etc.
- The use of oily substances, bleach, etc. is prohibited.
- Do not disassemble, repair or modify it by yourself.
- The warranty excludes injuries, malfunctions, damages caused by incorrect use, disassemble, modification, repair, etc., and we are not responsible for them once the above precautions and warnings are not followed.

Troubleshooting And Resolution

Trouble	Possible Causes	Solution
The product cannot be turned on	Insufficient Power	Check battery of the machine and remote control Charge for 1 hour before trying to turn on machine
	Machine power not on before operating remote controller	Please press the power button on both machine and remote controller
The machine shows normal operation but there is no EMS feeling on the skin	The electrode pads are not tightly attached to the skin to form a circuit	Adjust the strap to make sure electrode close to the facial skin
	EMS level stays on 0	Need to choose a mode and press level button to choose at least one level
There is an unbearable stinging sensation when using the product	Acne or pimples on the face	Do not use this product if you have any scratches or pimples on your face.
	Used an EMS grade that is not suitable for skin	Please reduce the intensity of EMS and choose the appropriate level
	The skin is too dry and the EMS is not transmitted smoothly, which may cause irritation to the skin.	Before using again, please wipe the product head or face with a wet tissue or towel.
	Facial skin allergies and sensitivity to micro-current	Check facial skin for allergies. If you have allergies, discontinue use. Use after recovery

Adjusted EMS level but no obvious EMS feeling	Choose low level EMS	Gradually increase the level until you feel EMS sensation
	The skin is too dry causing the micro-current to be unable to be fully conducted.	Please add moisturizing gel in time to keep skin moist.
	The electrodes are not in close contact with the face	Adjust the machine to ensure that all electrode pads are close to the skin
	There is dirt or oil on the massage head that blocks the EMS	Check and clean the electrode pads
	The battery power is insufficient, resulting in the inability to release high-intensity micro-current	Please charge the product in time

Q&A

Q: Is it possible not to use gel, etc.?

A: If conductive material is not used, the EMS effect will be reduced, so we recommend applying conductive liquid, such as gel, before use.

Q: My skin turns red after use. Is this normal?

A: Heating and EMS will accelerate blood flow, and it is normal for the area of use to appear reddish.

Q: About usage time and frequency

A: We recommend using it once a day for about 15 minutes each time. If you want to use it continuously, we recommend an interval of at least 5 hours. (The above time is a general reference time. The specific time will be adjusted according to your skin condition before use.)

Q: Why do my teeth hurt when using them?

A: Micro-current conducts the entire face, because teeth during sensitive periods will feel slightly. If you are undergoing dental treatment or feel discomfort in your gums, please adjust the intensity and area of use of EMS.

(If you still feel unwell, consult your doctor.)

Q: Is the stimulation different on the left and right sides of the face?

A: Theoretically, the intensity of the micro-current released by this product is the same, but due to the different moisture of skin in different areas, the conductivity will be different. If you feel different stimulation, please apply gel or adjust the electrode pads.

Q: My face feels uncomfortable and tired.

A: EMS will exercise facial muscles. If you experience slight fatigue and soreness, it is normal. Please use low intensity to reduce discomfort. If the discomfort is very severe, please discontinue use.

Q: Can men also use it?

A: Yes, this product is suitable for both men and women.

Product Disposal

This product contains a lithium-ion battery. Lithium batteries are a valuable resource that can be recycled. When disposing of this product, remove the lithium-ion battery and send it to the recycling bin for disposal.
