ANLAN · EAN 6977254877150

Machine translation from Polski. In case of doubt the manufacturer's original document prevails.

Hair Straightener with Ionization and Infrared ANLAN 05-AJB51-02E

User Manual

Rubber Cover

This document is a translation of the original user manual created by the manufacturer.

Detailed information about the distributor/manufacturer warranty conditions is available on the website <https://serwis.innpro.pl/gwarancja>.

The product should be regularly maintained (cleaned) by the user or through specialized service points at the user's cost and responsibility. In the absence of information about necessary periodic or service maintenance actions in the user manual, the user should regularly, at least once a week, assess the physical condition of the product against that of a physically new product. If any deviation is detected or identified, urgent maintenance (cleaning) or service steps should be taken. Failure to properly maintain (clean) and respond upon detecting a state of deviation may lead to permanent damage to the product. The manufacturer is not responsible for damages resulting from neglect.

Warnings and Safety Information

All information regarding the use of the product can be found in the user manual. Before you start using it, familiarize yourself with its content and follow the guidelines contained within.

Also, review the following information before use:

Usage Warnings

Risk of Product Damage:

- Devices should be used according to their intended purpose and the manufacturer's recommendations.
- Avoid contact of the device with water or other liquids if it is not waterproof.
- Do not use products near damp areas, such as bathrooms, unless the device is intended for use in such conditions.
- Regularly check power cords and plugs — damage may lead to short circuits or electric shock.

- Do not leave devices plugged in without supervision, even if they are turned off.
- For battery-operated devices, avoid overcharging or using non-original chargers to prevent overheating or failure.

User Hazards:

- Heating devices (e.g., straighteners, curling irons) can reach very high temperatures. Avoid contact of hot surfaces with skin or flammable materials to prevent burns and fires.
- Do not use products on wet hair unless the manufacturer explicitly allows it — this may cause damage to hair or the device.
- Keep clippers and devices with blades out of reach of children to avoid the risk of cuts.
- Never use devices with damaged housings or exposed electrical components.

Electronics Risks:

- Use only original power sources and accessories recommended by the manufacturer.
- If you detect unnatural odors (e.g., burnt plastic), immediately disconnect the device from power and contact service.

Information on Proper Use

Recommendations for Use:

- Before starting to use, ensure that the device is properly set up and connected to a stable power source.
- Use heat protection products to safeguard hair from high temperatures during styling.
- Use devices in well-ventilated areas to avoid overheating and moisture buildup.
- For hair dryers with ionization function, avoid blocking the ventilation openings to prevent overheating of the device.
- After using straighteners, curling irons, or hair dryers, place the device on a heat-resistant surface to avoid damage to work surfaces.

Maintenance and Storage:

- Regularly clean devices according to the user manual to ensure optimal performance and longevity.
- For clippers, maintain the blades using care oils (if applicable).
- If the device is not used for an extended period, disconnect it from the power source.
- Store devices in a dry place, away from heat sources, dust, and moisture.

Additional Precautions

User Adaptation:

- For children or elderly individuals, adult supervision is recommended when using electrical devices.

- For beginners, it is advisable to use devices with safety features, such as automatic shut-off after a certain time.
- Choose devices suitable for your hair type — e.g., dryers with ionization for hair prone to static.

Damage and Service:

- If you detect mechanical damage (e.g., cracks, housing damage), immediately stop using the device and contact an authorized service.
- For repairs and parts replacement, use only original components supplied by the manufacturer.

Declaration of Conformity

The products have been designed in accordance with the safety requirements specified in Regulation (EU) 2023/988. They meet the relevant technical standards, including those concerning user safety, electromagnetic compatibility, and material durability.

Environmental Protection

Used electronic equipment marked in accordance with the European Union directive must not be disposed of together with other municipal waste. It is subject to selective collection and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The system for collecting used equipment complies with locally applicable environmental protection regulations regarding waste disposal. Detailed information on this subject can be obtained at the municipal office, waste management facility, or the store where the product was purchased. The product meets the requirements of the so-called New Approach directives of the European Union (EU) concerning issues related to user safety, health protection, and environmental protection, which define hazards that should be detected and eliminated.
