## Capacitive stylus / pen Baseus Smooth Writing 2

### User manual

Model: SXBC060103

#### Intended use

For safety and certification reasons, the product must not be modified or altered in any way. Using the product for purposes other than those described may result in damage to the product. Furthermore, improper use may pose hazards. Please read the user manual carefully and keep it for future reference.

#### Safety usage instructions.

You must read and follow the safety instructions contained in the manual.

1. The product is not a toy. Keep it out of reach of children and pets.
2. Protect the product from extreme temperatures, direct sunlight, strong vibrations, high humidity, moisture, flammable gases, vapors, and solvents.
3. Do not subject the product to mechanical loads.
4. If safe operation is no longer possible (the product is damaged, not functioning properly), stop using it and secure the product against reuse.
5. Handle the product with care. Shocks, impacts, or dropping the product may cause damage.
6. If there are any doubts regarding the operation or safety of the product, consult a qualified professional.
7. If you have any questions that are not answered in this manual, please contact our customer service office or another specialist.

## Capacitive stylus / pen Baseus Smooth Writing 2 (blue)

Unleash your creativity and draw like a professional! The Baseus stylus allows you to comfortably operate your iPad and lets you draw and write as if on real paper. The product is fully compatible with most iPads, features a sturdy construction, and supports magnetic charging. You can customize its functionality to your needs — the stylus offers up to 14 setting functions. It is highly precise and operates without delays, and once detected, the screen automatically stops responding to your hand, allowing you to write and draw freely. The package includes a replaceable tip.

### Precise operation

The stylus stands out for its high precision and exceptionally strong signal — thanks to the gold-plated tip. As a result, you can enjoy perfect replication of your movements at any angle. Moreover, the tablet automatically detects the stylus's operation. During this time, it stops responding to hand touch, so you can draw and write freely without worrying about accidentally switching something on or off.

### Easy charging

The Baseus stylus is the perfect replacement for the original Apple Pencil. Its design allows for charging using a dedicated magnetic port. Simply place it on the appropriate spot on the iPad to easily and conveniently recharge the stylus. A single charge guarantees up to 10 hours of use or 12 months of standby time. A message on the tablet will inform you about the stylus's charge status.

#### Sturdy construction

The product is made from high-quality materials. The core of the stylus is gold-plated, ensuring stable and reliable operation without delays. It is durable, exceptionally lightweight, and finished with a pleasant-to-touch, non-slip material that provides unmatched comfort, allowing you to use it freely for many hours. The package includes a replaceable tip.

#### Included in the package

Stylus x 1

Stylus tip x 1

Connection type: Wireless / via app

Battery capacity: 125 mAh

Operating time: 10 h on a single charge / 12 months in standby mode

Material: ABS + PC

Compatibility: iPad mini 6, Air 4, 5, and iPad Pro series 0-6

Dimensions: 165 x 9 mm

Compatibility: iPad (6,7,8,9,10, mini 5, mini 6, air 3, air 4, air 5, Pro, Pro 3, Pro 2, Pro 4, Pro 5, Pro 6)

## Simplified declaration of conformity

Manufacturer: Shenzhen Times Innovation Technology Co., Ltd

Address: 2nd Floor, Building B, Baseus Intelligence Park, No.2008, Xuegang Rd, Gangtou Community, Bantian Street, Longgang District, Shenzhen

Product: Capacitive stylus / pen

Model: Smooth Writing 2

Radio frequency: 2402MHz-2480MHz

Max. radio frequency power: <20 dBm

The product complies with the directive of the European Parliament and Council 2014/53/EU of April 16, 2014, on the harmonization of the laws of member states regarding the marketing of radio equipment and repealing directive 1999/5/EC.

The declaration of conformity is available on the website:

## Environmental protection

Used electronic equipment marked in accordance with the European Union directive must not be disposed of with other municipal waste. It is subject to selective collection and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The waste collection system complies with locally applicable environmental protection regulations regarding waste disposal. Detailed information on this topic can be obtained from the municipal office, waste management facility, or the store where the product was purchased. The product meets the requirements of the so-called New Approach directives of the European Union (EU) concerning safety, health protection, and environmental protection, identifying hazards that should be detected and eliminated.

This document is a translation of the original user manual created by the manufacturer.

Detailed information about the distributor / manufacturer warranty conditions is available on the website <https://serwis.innpro.pl/gwarancja>

The product should be regularly maintained (cleaned) by the user or through specialized service points at the user's cost and responsibility. If there is no information about necessary periodic or service maintenance actions in the user manual, the user should regularly, at least once a week, assess the physical condition of the product against that of a physically new product. If any deviation is detected or noted, urgent maintenance (cleaning) or service steps should be taken. Failure to properly maintain (clean) and respond upon detecting a deviation may lead to permanent damage to the product. The warranty does not cover damages resulting from negligence.

## Safety measures

Before starting to charge, check if the device contacts are clean.

Never leave the device unattended while in use and charging.

Ensure that you can quickly disconnect the device from the power source in an emergency.

Never expose the device to high temperatures.

Charge the device in a dry and well-ventilated place away from flammable materials, maintaining a minimum distance of 1m from other objects.

Never cover the device while charging.

Never use a power supply, charging station, cables, etc., without the manufacturer's recommendation and certification.

Take care of your property; the device is equipped with cells that are difficult to extinguish, so keep a fire blanket handy.

## LI-ION battery

The device is equipped with a LI ION (lithium-ion) battery, which, due to its physical and chemical structure, ages over time and with use. The manufacturer specifies the maximum operating time of the device under laboratory conditions, where optimal working conditions for the device exist, and the battery itself is new and fully charged. Actual operating time may differ from that declared in the offer and this is not a defect of the device but a characteristic of the product. To maintain maximum battery life, it is not recommended to discharge it below 3.18V or 15% of total capacity. Lower values, such as 2.5V for the cell, permanently damage it and this is not covered by the warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and its charge level should be checked periodically every two months. Store the battery and device in a dry place, away from sunlight and negative temperatures.

## LI-PO battery

The device is equipped with a LI PO (lithium-polymer) battery, which, due to its physical and chemical structure, ages over time and with use. The manufacturer specifies the maximum operating time of the device under laboratory conditions, where optimal working conditions for the device exist, and the battery itself is new and fully charged. Actual operating time may differ from that declared in the offer and this is not a defect of the device but a characteristic of the product. To maintain maximum battery life, it is not recommended to discharge it below 3.5V or 5% of total capacity. Lower values, such as 3.2V for the cell, permanently damage it and this is not covered by the warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and its charge level should be checked periodically every two months. Store the battery and device in a dry place, away from sunlight and negative temperatures.
