Monitor Light

User Manual

Thank you for your purchase. Please read the instructions carefully before using the device and keep it for future reference.

Introduction

The asymmetrical lamp from Baseus reflects light from the monitor and does not create reflections, while the blue light filter provides relief for the eyes during work and gaming at night.

Product Features

- ① Asymmetrical light source
- ② Reduction of blue light emission
- ③ 3 operating modes
- ④ Touch panel
- ⑤ Simple operation
- ⑥ Quick and easy installation
- ⑦ Stable metal construction
- ⑧ USB-C power supply

Specifications

Model: DGIWK-B01 / DGIWK-B02

Material: Aluminum + PC + ABS

Nominal voltage: 5V

Power: 5W (Max)

Light source: LED

Color rendering index: 80

Color temperature: 5500K - 2800K - 4000K

Luminous flux: 85lm

Number of LEDs: 80 pieces

Product dimensions: 450x66x92mm

Product weight: 480g

Package Contents

- Baseus lamp
- USB power cable (1.5m)
- User manual

Product Structure

Usage

Installation:

Note: The lamp is designed only for computer screens with a thickness of between 8mm - 20mm.

1. Attach the lamp to the top of the screen in the middle, as shown below:

2. Connect one end of the USB cable to the lamp and the other end to the USB port of the computer or a 5V rated adapter.

Note: Do not use an adapter with a rating higher than 5V. This may damage the device.

3. Turn on the lamp and adjust the angle and brightness.

Operation

1. Power on/off: touch the power icon on the touch panel.

2. Operating modes: white light (5500K) - warm light (2800K) - white-yellow light (4000K). To set the selected mode, touch the bulb icon on the touch panel.

3. Brightness adjustment: press and hold the dimming icon located on the left side of the touch panel to adjust the brightness.

4. Memory function: When the lamp is turned on via the USB cable, the device will turn on in the mode that was previously set.

Note: The memory function will not work if the USB cable is disconnected; it will default to the first mode of the lamp.

Precautions

1. To connect the lamp to a power source, use a computer, power bank, charger, etc. with a nominal voltage of 5V. Using a charger with a voltage rating higher than 5V may damage the product or pose a safety risk to users.
2. Do not connect the lamp to unstable devices. This poses a risk of falling and damaging the lamp.
3. Do not cover the lamp with paper, fabric, or other materials. This poses a fire risk.
4. Do not use the product in a humid environment.

- 5. Do not connect the lamp to a power source with wet hands to avoid the risk of electric shock.
- 6. Regularly clean the device. Before cleaning, disconnect the device from the power source. Use a dry, soft cloth for cleaning. Do not use detergents or other liquids.
- 7. Do not touch the lamp after it has been turned on or for 3 minutes after it has been turned off to avoid the risk of burns.
- 8. If you do not intend to use the device for an extended period, disconnect it from the power source.
- 9. Do not attempt to disassemble the device yourself.
- 10. The device is intended for indoor use.
- 11. Do not use the product if it is damaged and do not attempt to repair it yourself. Contact an authorized service center.
- 12. The product does not have a replaceable bulb. If the lamp is worn out, replace the product with a new one.
- 13. The product should not be mounted on round devices.

List of harmful substances contained in the product

Environmental Protection

Waste electrical and electronic equipment marked in accordance with the European Union directive must not be disposed of with other municipal waste. It is subject to selective collection and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The collection system for waste equipment complies with locally applicable environmental regulations regarding waste disposal. Detailed information on this can be obtained from the municipal office, cleaning facility, or the store where the product was purchased.

The product meets the requirements of the so-called New Approach directives of the European Union (EU) regarding issues related to user safety, health protection, and environmental protection, identifying hazards that should be detected and eliminated.
