FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Warnings and safety information

All information regarding the operation of the appliance can be found in the operating instructions. Before using it, read its contents and follow the instructions contained therein.

Also read the following information before use:

Warnings for use

1. Safety when driving:

- Use of the adapter must not distract the driver's attention from driving. Set up the device and connect it to your smartphone before driving.
- Use the voice control feature to minimise the need to touch the screen while driving.

2. Power supply safety:

- Adapters should only be connected to USB ports that comply with the manufacturer's recommendations (e.g. in a car multimedia system or 12V power supply).
- Do not use the device if the power cable or USB port is damaged.

3. Risk of electromagnetic interference (EMC):

- The adapters may cause interference with other electronic devices in the vehicle, such as navigation or communication systems. Contact the manufacturer if problems occur.

4. Protection of the device from external influences:

- Do not expose the adapter to extreme temperatures, moisture or direct sunlight for an extended period of time.
- Avoid contact of the device with water or other liquids.

5. Safety for use in the car:

- Ensure that the device is placed in a location that does not obstruct visibility or interfere with other vehicle functions.
- The adaptor's power cords should be routed so that they do not pose a risk of passengers' or driver's legs becoming entangled.

Information on correct use

1. Installation and setup:

- Before first use, read the adapter's user manual and make sure it is compatible with the vehicle's multimedia system and your smartphone.
- Pair your device with CarPlay/Android Auto according to the manufacturer's instructions. Ensure that the Bluetooth and Wi-Fi functions are active on your smartphone.

2. Regular software updates:

- To ensure compatibility with the latest versions of smartphone operating systems, regularly update the adapter software.
- Only download updates from the manufacturer's website or via a dedicated app.

3. Cleaning and maintenance:

- Regularly check the condition of the device and the power cables to prevent damage.
- Use a dry, soft cloth to clean the adapter. Avoid using chemicals.

4. Compatibility and range:

- The adapter works best when the smartphone is in close proximity to the device. Do not place it in lockers or places that may interfere with the signal.

Additional precautions

● Environmental protection:

- Dispose of used or damaged adapters in accordance with local electronic waste regulations.
- Do not dispose of the device in regular waste containers.

● Data security:

- Ensure that the adapter uses a secure Bluetooth/Wi-Fi connection to prevent unauthorised access to your smartphone data.
- Regularly change Wi-Fi passwords if generated by the adapter.
