+ Microphone

Safety Notes

- Installation should be performed by individuals with appropriate technical knowledge in PC construction.
- To avoid damaging the computer, avoid touching contacts, wires, and electronic components. Limit contact with electronic components to a minimum.
- The manufacturer is not responsible for damages and injuries caused by failure to follow safety instructions and information contained in this user manual.
- The product and its packaging should be kept out of reach of children and pets. The packaging includes plastic wrap, which a child could suffocate on while playing.
- Mechanical stress on the product is prohibited - strong shocks, impacts, drops, or crushing of the product may cause damage.
- The product is not allowed to operate under unfavorable conditions. Unfavorable conditions include, primarily: exposure to direct sunlight, high or very low ambient temperatures, strong vibrations, high humidity, environments with gases, dust, or flammable and aggressive liquids.
- If the product has been damaged or stored for an extended period under poor or unfavorable conditions, safe operation of the device is not possible. Use of the product must be immediately discontinued and it should be secured against reuse for safety reasons.
- Before assembling the computer, consider the user manuals of all components that will be inside the case.
- Wear gloves to prevent accidents during component installation.
- Do not apply excessive force during assembly, as this may cause serious damage to the case.
- Incorrect connection of cables and wires may cause a fire due to a short circuit. When connecting, refer to the instructions of the other components.
- Be careful not to block ventilation openings.
- Do not insert hands or other objects into the case while the computer is running. This poses a risk of injury to the hand or damage to the device.
- The case should remain closed during computer operation, and the side panels should be properly secured with screws.
- Under no circumstances should the product and power cables be handled with wet or damp

hands. This poses a risk of fatal electric shock.

- If in doubt regarding the operation, safety, or connection of the product, consult the Manufacturer or a qualified professional.
- All maintenance, adjustment, and repair work on the product may only be carried out by a qualified person in a specialized facility.

Safety Notes

- The manufacturer of the product is not responsible for damages and injuries caused by failure to follow safety instructions and information contained in this user manual.
- The product and its packaging should be kept out of reach of children and pets. The packaging includes plastic film, which a child could suffocate on while playing.
- The product should be used for its intended purpose. Improper use may cause damage to the product and be hazardous to health.
- Before use, ensure that the product is in proper condition.
- Mechanical loading of the product is prohibited - strong shocks, impacts, drops, or crushing of the product may cause damage.
- The product is not allowed to operate under unfavorable conditions. Unfavorable conditions primarily include: exposure to direct sunlight, high or very low ambient temperatures, strong vibrations, high humidity, environments with gases, dust, or flammable and aggressive liquids.
- If the product has been damaged or stored for an extended period under poor or unfavorable conditions, safe operation of the device is not possible. The use of the product must be stopped immediately, and for safety reasons, it should be secured against reuse.
- Care should be taken not to block ventilation openings.
- To prevent damage caused by condensation, allow the device to warm up to room temperature before use.
- Do not insert hands or other objects into the product.
- Clean only with a dry, clean cloth. Do not touch with wet hands.
- In case of doubts regarding operation, safety, or connecting the product, please contact the Manufacturer or a qualified professional.
- All maintenance, adjustment, and repair work on the product may only be carried out by a qualified person.

Environmental Protection

Used electronic equipment marked in accordance with the European Union directive must not be disposed of together with other municipal waste. It is subject to selective collection

and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The system for collecting used equipment complies with locally applicable environmental protection regulations regarding waste disposal. Detailed information on this topic can be obtained from the municipal office, waste management facility, or the store where the product was purchased.

The product meets the requirements of the so-called New Approach directives of the European Union (EU) concerning issues related to user safety, health protection, and environmental protection, which define hazards that should be detected and eliminated.
