Safety Notes

- Installation should be performed by individuals with appropriate technical knowledge regarding PC assembly.

- To avoid damage to the computer, do not touch contacts, wires, and electronic circuits. Limit contact with electronic components to a minimum.

- The manufacturer is not responsible for damages and injuries caused by failure to follow safety instructions and information contained in this user manual.

- The product and its packaging should be kept out of reach of children and pets. The packaging includes plastic wrap, which a child could suffocate on while playing.

- Mechanical stress on the product is prohibited - strong shocks, impacts, drops, or crushing the product may cause damage.

- The product is not allowed to operate under unfavorable conditions. Unfavorable conditions include, primarily: exposure to direct sunlight, high or very low ambient temperatures, strong vibrations, high humidity, environments with flammable gases, dust, or liquids, and aggressive substances.

- If the product has been damaged or stored for an extended period under poor or unfavorable conditions, safe operation of the device is not possible. It is imperative to cease using the product and secure it against reuse for safety reasons.
- Before assembling the computer, consider the user manuals of all components that will be inside the case.
- Wear gloves to prevent accidents during the installation of components.
- Do not apply excessive force during installation, as it may cause serious damage to the case.
- Incorrect connection of cables and wires may cause a fire due to a short circuit. When connecting, refer to the instructions of the other components.
- Take care not to block ventilation openings.
- Do not insert hands or other objects into the case while the computer is operating. This poses a risk of injury to the hand or damage to the device.
- The case should remain closed during computer operation, and the side panels should be properly secured with screws.
- Under no circumstances should the product and power cables be handled with wet or damp hands. This poses a risk of fatal electric shock.
- In case of doubts regarding operation, safety, or connecting the product, please contact the Manufacturer or a qualified professional.
- All maintenance, adjustment, and repair work on the product may only be carried out by a qualified person in a specialized facility. This document is a translation of the original user manual created by the manufacturer. The product should be regularly maintained (cleaned) by the user or through specialized service points at the user's cost and responsibility. If there is no information about necessary periodic or service maintenance actions in the user manual, the physical condition of the product should be assessed regularly, at least once a week, against that of a physically new product.

In the event of detecting or identifying any irregularity, urgent maintenance (cleaning) or service steps must be taken. Failure to perform proper maintenance (cleaning) and to respond when an irregularity is detected may lead to permanent damage to the product. The guarantor is not responsible for damages resulting from negligence.
