Safety notes

- Installation should be carried out by persons with appropriate technical knowledge in PC construction.

- To avoid damaging the computer, avoid touching contacts, wires, and electronic circuits. Contact with electronic components should be minimized.

- The manufacturer of the product is not responsible for damages and injuries caused by failure to follow safety instructions and information contained in this user manual.

- The product and its packaging should be kept out of reach of children and pets. The

packaging includes plastic wrap, which a child could suffocate on while playing.
- Mechanical loading of the product is prohibited - strong shocks, impacts, dropping, or crushing the product may cause damage.
- The product is not allowed to operate under unfavorable conditions. Unfavorable conditions include, primarily: exposure to direct sunlight, high or very low ambient temperatures, strong vibrations, high humidity, environments with flammable gases, dust, or liquids, and aggressive substances.
- If the product has been damaged or stored for an extended period under poor or unfavorable conditions, safe operation of the device is not possible. It must be absolutely ceased from use and secured against reuse for safety reasons.
- Before assembling the computer, consider the user manuals of all components that will be inside the case.
- Gloves should be worn to prevent accidents during the installation of components.
- During assembly, do not apply excessive force, as this may cause serious damage to the case.
- Incorrect connection of cables and wires may cause a fire due to a short circuit. When connecting, refer to the instructions of the other components.
- Care should be taken not to block ventilation openings.
- Do not insert hands or other objects into the case while the computer is operating. This poses a risk of injury to the hand or damage to the device.
- While the computer is operating, the case should remain closed, and the side panels should be properly secured with screws.
- Under no circumstances should the product and power cables be handled with wet or damp hands. This poses a risk of fatal electric shock.
- In case of doubts regarding operation, safety, or connecting the product, please contact the Manufacturer or a qualified professional.
- All maintenance, adjustment, and repair work on the product may only be carried out by a qualified person in a specialized facility.

Environmental protection

Used electronic equipment marked in accordance with the European Union directive must not be disposed of together with other municipal waste. It is subject to selective collection and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The system for collecting used equipment complies with locally applicable environmental protection regulations regarding waste disposal. Detailed information on this matter can be obtained

from the municipal office, cleaning facility, or the store where the product was purchased. The product meets the requirements of the so-called New Approach directives of the European Union (EU) concerning issues related to user safety, health protection, and environmental protection, identifying hazards that should be detected and eliminated. This document is a translation of the original user manual created by the manufacturer. Detailed information on the distributor/manufacturer warranty conditions is available at https://serwis.innpro.pl/gwarancja.

To ensure the longest and safest possible use of the product, it should be regularly maintained either by yourself or by specialized service points. In the absence of information regarding necessary periodic or service maintenance actions in the user manual, the physical condition of the product should be assessed regularly, at least once a week, against that of a physically new product. If any differences are detected or noted, the seller must be urgently notified of this fact. Failure to properly maintain the product and to react upon detecting a difference and notifying the seller may lead to permanent damage to the product, property, or health, for which the manufacturer and guarantor will not bear any responsibility.
