User manual

1 SPECIFICATIONS

Product name Car camera	
Model DR1601-02, DR1601-03	
□ A	
Resolution 2K 2560 × 1440	
Dimensions 100.5 × 66.7 × 51.7 mm	
Memory card Supports Micro-SD cards (up to 64GB)	

2 PACKAGE CONTENTS

- Car camera
- USB charger
- Electrostatic sticker
- 3M adhesive tape
- Wire trimming tool
- User manual
- Power cable
- Rear camera
- Rear camera extension cable

Note: The single-channel package does not include the rear camera and extension cable.

3 PRODUCT OVERVIEW

1. Lens
2. Display
3. USB Type-C port
4. Rear camera port
5. MICROPHONE
6. Speaker
7. Function buttons
8. Micro-SD card slot
9. Mounting bracket

4 BUTTON DESCRIPTION

Return - Back

Left/Up - Left / Up

Right/Down - Right / Down

Confirm - Confirm

Reset: Press and hold for 6 seconds - Restart: press and hold for 6 seconds

5 INSTALLATION

Step 1: Clean the windshield and attach the electrostatic sticker to the recommended area.

Step 2: Insert the Micro-SD card into the card slot.

Step 3: Remove the protective film from the lens, peel off the 3M protective film, and stick the car camera to the electrostatic sticker on the windshield.

Step 4: Connect the power cable to the car's cigarette lighter and to the power outlet.

Step 5: Connect the rear camera to the car camera. The exact routing of the cables is shown in the diagram below.

Note: If you purchased the single-channel kit, you can skip this step.

Step 6: Start the vehicle and adjust the camera angle based on the preview screen.

For more details on installation, scan the QR code below.

6 APPLICATION INSTRUCTIONS

Install the DDPAI app

Download the DDPAI app from the Google Play Store (Android) or App Store (iOS).

Connect the car camera to your smartphone

Step 1: Turn on the car camera. Enable Bluetooth on your mobile phone.

Step 2: Launch the DDPAI app, press “Device” > “+ Add device”.

Step 3: Select the current device name (DDP1AXXX).

Step 4: Press the confirmation button on the device for authorization.

For detailed information on how to use the app, scan the QR code below.

This document is a translation of the original user manual created by the manufacturer.

Detailed information about the distributor/manufacturer warranty conditions is available on the website <https://serwis.innpro.pl/gwarancja>

The product should be regularly maintained (cleaned) by the user or through specialized service points at the user's cost and responsibility. In the absence of information about necessary maintenance or service actions in the user manual, the user should regularly, at least once a week, assess the physical condition of the product against that of a physically new product. If any deviation is detected or identified, urgent maintenance (cleaning) or service steps should be taken. Failure to properly maintain (clean) and respond upon detection of a deviation may lead to permanent damage to the product. The warranty does not cover damages resulting from neglect.

Warnings and safety information

All information regarding the operation of the device is contained in the user manual. Before using it, familiarize yourself with its content and follow the instructions provided.

Before use, also review the following information:

Usage warnings

Installation safety: Install the device in a location that does not obstruct the driver's visibility or distract attention while driving. It is most often recommended to mount it behind the rearview mirror. Ensure that the dashcam mount (e.g., suction cup holder) is secure and stable to avoid the device falling during driving.

- Install the device in a location that does not obstruct the driver's visibility or distract attention while driving. It is most often recommended to mount it behind the rearview mirror. Ensure that the dashcam mount (e.g., suction cup holder) is secure and stable
- to avoid the device falling during driving.

Electrical safety: The dashcam should be connected to the cigarette lighter socket (12V/24V) or a dedicated power supply according to the manufacturer's instructions. Avoid using the device with damaged cables or plugs to prevent short circuits or other electrical failures.

- The dashcam should be connected to the cigarette lighter socket (12V/24V) or a dedicated power supply according to the manufacturer's instructions. Avoid using the
- device with damaged cables or plugs to prevent short circuits or other electrical failures.

Protecting the device from external factors: Dashcams are not moisture-resistant. Avoid contact with water or excessive moisture. Do not expose the device to extreme temperatures, e.g., direct sunlight for extended periods, as this may lead to overheating or damage.

- Dashcams are not moisture-resistant. Avoid contact with water or excessive moisture. Do not expose the device to extreme temperatures, e.g., direct sunlight for extended
- periods, as this may lead to overheating or damage.

Safety of use in the vehicle: Ensure that the power cables are properly routed so they do not interfere with vehicle operation or create a tripping hazard for passengers.

tripping hazard for passengers. Turn off the dashcam screen function while driving to avoid distracting the driver.

-

Compliance with legal regulations: Check local regulations regarding video recording in public places to ensure that using the dashcam is legal. In some countries, recording individuals without their consent or using devices on the windshield may be restricted by law.

- Check local regulations regarding video recording in public places to ensure that using the dashcam is legal. In some countries, recording individuals without their consent or
- using devices on the windshield may be restricted by law.

Information on proper usage

Installation and setup: Before first use, install the device according to the user manual, paying attention to the appropriate recording angle (ideally covering the widest possible range of the road). If the device requires a memory card, ensure that you are using a card compatible with the dashcam and with the appropriate write speed.

- Before first use, install the device according to the user manual, paying attention to the appropriate recording angle (ideally covering the widest possible range of the road). If the device requires a memory card, ensure that you are using a card compatible with
- the dashcam and with the appropriate write speed.

Operating the device: Regularly check if the device is recording video and audio correctly. In case of issues, perform diagnostics according to the user manual. If the dashcam has a parking mode feature, ensure it is properly configured and that the vehicle has adequate power supply.

- Regularly check if the device is recording video and audio correctly. In case of issues, perform diagnostics according to the user manual. If the dashcam has a parking mode
- feature, ensure it is properly configured and that the vehicle has adequate power supply.

Maintenance and storage: Regularly clean the camera lens with a soft cloth to ensure clear recording images. If the dashcam is not used for an extended period, store it in a dry place, protecting it from moisture and extreme temperatures.

- Regularly clean the camera lens with a soft cloth to ensure clear recording images. If the dashcam is not used for an extended period, store it in a dry place, protecting it
- from moisture and extreme temperatures.

Software updates: Regularly check for available software updates for the device to ensure compatibility with the latest features and manufacturer fixes.

- Regularly check for available software updates for the device to ensure compatibility with the latest features and manufacturer fixes.

Additional precautions

- Data protection: The dashcam may store personal data (e.g., video recordings). Secure the device with a password if such an option is available to prevent unauthorized access. Regularly delete unnecessary

- recordings to free up space on the memory card and avoid overwriting critical materials. The dashcam may store personal data (e.g., video recordings). Secure the device with a password if such an option is available to prevent unauthorized access.
- Regularly delete unnecessary recordings to free up space on the memory card and avoid overwriting critical materials. Environmental protection: Used or damaged dashcams should be disposed of at electronic waste collection points, in accordance with local regulations. Used or damaged dashcams should be disposed of at electronic waste collection points, in accordance with local regulations.

SIMPLIFIED EU DECLARATION OF CONFORMITY

DDPAI Technology Co., Ltd hereby declares that the type of radio device Dashcam DDPAI N2 Dual is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following website: [https://](https://files.innpro.pl/ddpai/6934915204946/doc)

files.innpro.pl/ddpai/6934915204946/doc

Manufacturer's address: Dashi 1st Road Building 8A 518000 Shenzhen, cn

Radio frequency: 2.4Ghz (2400Mhz - 2483.5Mhz)

Maximum radio frequency power: <20dBm

Environmental Protection

Waste electrical and electronic equipment marked in accordance with European Union directive must not be placed together with other municipal waste. It is subject to selective collection and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The system for collecting used equipment complies with locally applicable environmental regulations regarding waste disposal. Detailed information on this can be obtained from the municipal office, waste management facility, or the store where the product was purchased.

The product meets the requirements of the so-called New Approach directives of the European Union (EU) regarding safety, health protection, and environmental protection, identifying hazards that should be detected and eliminated.
