Power Bank EcoFlow RAPID

25000 mAh, 170W

User Manual

General Safety Guidelines

Disclaimer: This product contains the necessary printed documentation required for configuration and basic operation. Detailed operating instructions, supplementary materials, and the most up-to-date information about the product can be found at <https://www.ecoflow.com/support/download/>. Before starting to use the product, please read the product documentation in its entirety and ensure that it has been understood. Improper use may cause serious injury, damage, or material loss. By using this product, the user agrees to all terms specified in the product documentation and accepts them. EcoFlow is not responsible for any losses, damages, or injuries caused by improper use or failure to follow the instructions.

- Due to the energy conversion efficiency in the power bank, the actual capacity is lower than the nominal battery capacity.
- The product should be used according to the operating instructions contained in this manual. Improper use may damage the product or pose a risk to persons and property.
- Check and ensure that the charging voltage of the digital device is compatible with the output voltage of the power bank.
- Choose and use the original charging cable for your digital device.
- To extend the life of the power bank, it should be charged regularly.
- WARNING: Risk of fire and burns. Do not open, crush, heat above 45°C, or burn.
- Do not use a power bank that has been submerged in water. For disposal, contact a battery recycling company.
- Keep the product away from water, fire, and heat sources.
- To reduce the risk of injury, strict supervision is required when using the product near children.
- If the product shows visible deformation, leakage, or damage, stop using it immediately and contact a recycling company for disposal.
- The product contains no user-serviceable parts, and the battery is not replaceable.
- Throwing the battery into fire or a heating furnace, as well as mechanically compressing or cutting the battery, may cause an explosion.
- Placing the battery in an environment with extremely high temperatures or low air pressure may cause an explosion or leakage of flammable liquids or gases.
- The product automatically enters standby mode when not in use.
- Do not

expose the product to fire or excessive temperature. Exposure to fire or temperatures above 100°C may cause an explosion. • Do not expose the product to rain or snow. • Do not disassemble, repair, or modify this product yourself. For any repairs, please contact EcoFlow customer service. Model: EF-HB-002

Dimensions: 157 x 53.8 x 48.8 mm (6.2 × 2.1 × 1.9 inches)

Weight: 556.7 g (1.2 lbs)

Charging Temperature: from 0°C to 45°C (32°F–113°F)

Discharging Temperature: from -10°C to 45°C (14°F–113°F)

Storage Temperature: from -20°C to 45°C (-4°F–113°F)

Altitude: ≤3000 m (9842.5 ft)

Environmental Protection

Used electronic equipment marked in accordance with the European Union directive must not be placed together with other municipal waste. It is subject to selective collection and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The system for collecting used equipment complies with locally applicable environmental protection regulations regarding waste disposal. Detailed information on this can be obtained from the municipal office, waste management facility, or the store where the product was purchased. The product meets the requirements of the so-called New Approach directives of the European Union (EU) concerning issues related to user safety, health protection, and environmental protection, specifying hazards that should be detected and eliminated. This document is a translation of the original user manual created by the manufacturer.

Detailed information about the distributor/manufacturer warranty conditions is available on the website <https://serwis.innpro.pl/gwarancja>

The product should be regularly maintained (cleaned) by the user or through specialized service points at the user's cost and scope.

In the absence of information about necessary periodic maintenance or service actions in the user manual, the physical condition of the product should be assessed regularly, at least

once a week, to determine any deviation from that of a physically new product. If any deviation is detected or identified, urgent maintenance (cleaning) or service steps should be taken. Failure to properly maintain (clean) and respond upon detecting a state of deviation may lead to permanent damage to the product. The warranty provider is not responsible for damages resulting from neglect. Importer:
