ND8/PL Hybrid Filter FREEWELL for DJI Mavic 4 Pro

User Manual

Description:

The Freewell ND8PL/ND4PL hybrid filter reduces light by 2 or 3 stops (ND4PL and ND8PL), allowing for smoother motion blur and better-balanced exposure in bright daylight conditions. By fitting two focal lengths, it ensures consistent, high-quality drone shots. This solution is useful for shooting in full sunlight, where overexposure can easily occur.
