

User Manual

ND Filter Freewell Osmo Pocket 4P ND8

Description

ND8 Filter Freewell for DJI Osmo Pocket 4P is a practical accessory that allows for a more professional look of recordings in bright lighting conditions. It limits the amount of light reaching the lens by 3 f-stops, thus facilitating the maintenance of appropriate exposure settings and preventing overexposure. It is an excellent choice when filming in daylight, when you want natural motion blur and smooth, cinematic shots.

Intended Use

For safety and certification reasons, the product must not be modified or altered in any way. Using the product for purposes other than those described may result in damage to the product. Improper use may also cause hazards. Read the user manual carefully and keep it for future reference. Always read and follow the safety instructions contained in this manual.

1. The product is not a toy. Keep it out of reach of children and animals.
2. Protect the product from extreme temperatures, direct sunlight, strong vibrations, high humidity, moisture, flammable gases, vapours and solvents.
3. Do not subject the product to mechanical stress.
4. If safe operation is no longer possible (the product is damaged or does not work properly), stop using it and secure it against unintended use.
5. Handle the product with care. Shocks, impacts or dropping the product may cause damage.
6. If in doubt about the operation or safety of the product, consult a qualified specialist.
7. If you have any questions that are not answered in this manual, please contact our customer service (e-mail: hurt@innpro.pl, website: <https://innpro.pl/>) or another specialist.
