

User Manual

ND Filter Freewell Osmo Pocket 4P ND32

Description

The Freewell ND32 filter for DJI Osmo Pocket 4P is an excellent choice for those who want to achieve a more professional look for their video footage when filming in intense daylight. It reduces the amount of light reaching the lens by 5 aperture stops, making it easier to maintain optimal exposure settings even on sunny days. It also allows for longer shutter speeds, which translates into smoother, more natural, and cinematic motion effects.

Intended Use

For safety and certification reasons, the product must not be modified or altered in any way. Using the product for purposes other than those described may result in damage to the product. Improper use may also cause hazards. Read the user manual carefully and keep it for future reference. Always read and follow the safety instructions contained in this manual.

1. The product is not a toy. Keep it out of reach of children and animals.
2. Protect the product from extreme temperatures, direct sunlight, strong vibrations, high humidity, moisture, flammable gases, vapours and solvents.
3. Do not subject the product to mechanical stress.
4. If safe operation is no longer possible (the product is damaged or does not work properly), stop using it and secure it against unintended use.
5. Handle the product with care. Shocks, impacts or dropping the product may cause damage.
6. If in doubt about the operation or safety of the product, consult a qualified specialist.
7. If you have any questions that are not answered in this manual, please contact our customer service (e-mail: hurt@innpro.pl, website: <https://innpro.pl/>) or another specialist.
