

User Manual

Freewell Filter for Insta360 Luna Ultra ND16/PL

Description

The Freewell ND16/PL filter for Insta360 Luna Ultra combines an ND16 neutral density filter with a polarizing filter, simultaneously providing 4 EV stops of light reduction and effective elimination of unwanted reflections. This makes it perfectly suitable for recording in bright, sunny conditions, by reducing glare and scattered light and emphasizing natural color saturation. The result is more contrasty shots with cleaner colors that require significantly less correction in post-production.

Intended Use

For safety and certification reasons, the product must not be modified or altered in any way. Using the product for purposes other than those described may result in damage to the product. Improper use may also cause hazards. Read the user manual carefully and keep it for future reference. Always read and follow the safety instructions contained in this manual.

1. The product is not a toy. Keep it out of reach of children and animals.
2. Protect the product from extreme temperatures, direct sunlight, strong vibrations, high humidity, moisture, flammable gases, vapours and solvents.
3. Do not subject the product to mechanical stress.
4. If safe operation is no longer possible (the product is damaged or does not work properly), stop using it and secure it against unintended use.
5. Handle the product with care. Shocks, impacts or dropping the product may cause damage.
6. If in doubt about the operation or safety of the product, consult a qualified specialist.
7. If you have any questions that are not answered in this manual, please contact our customer service (e-mail: hurt@innpro.pl, website: <https://innpro.pl/>) or another specialist.
