Freewell 14 Filter Set for
DJI Osmo Pocket 3

User Manual

Freewell 14 Filter Set for DJI Osmo Pocket 3

User Manual

Product Description

The set includes as many as 14 filters that will allow you to capture exceptional moments. With them, you will achieve sharp, detail-rich landscapes, capture the night sky, or create a soft glow around bright points in the frame. The filters also feature a magnetic, scratch-resistant, and oil-resistant design.

ND64PL/ SMIST1/4/LPR/CPL
- protective case
- cleaning cloth

Intended Use

Before use, ensure that the product is properly mounted. These filters are designed to improve image quality. They were created for the DJI Osmo Pocket 3 drone and should be used with it. For safety and certification reasons, the device must not be modified or altered in any way. Using the product for purposes other than those described may result in damage to the product. Additionally, improper use may pose hazards. Read the user manual carefully and keep it for future reference.

Safety usage tips.

Read and follow the safety instructions contained in the manual.

1. The product is not a toy. Keep it out of reach of children and pets.
2. Protect the product from extreme temperatures, direct sunlight, strong vibrations, high humidity, moisture, flammable gases, vapors, and solvents.
3. Do not expose the product to mechanical stress.
4. If safe operation is no longer possible (the product is damaged, not functioning properly), stop using it and secure the product against reuse.
5. Handle the product with care. Shocks, impacts, or dropping the product may cause damage.
6. If there are any doubts regarding operation, safety, or connecting the product, consult a qualified professional.
7. If you have any questions that are not answered in this manual, please contact our customer service office or another specialist.

Operation:

1. Choose the appropriate filter: From the filter set, select the one that best suits the lighting conditions in which you intend to take photos or videos.
2. Mount the filter: Gently place the selected filter onto the lens of the DJI drone. Ensure that it is evenly secured and stable.
3. Adjust camera settings: In the drone's camera settings, adjust parameters such as exposure, white balance, and contrast to achieve optimal results depending on the lighting conditions and effects you expect.
4. Monitor the image: On the drone's control monitor, observe the image to track the effects of the applied filter. Ensure that the image is clear and meets your expectations.
5. Cleaning and storage: After use, carefully clean the filter and store it in a safe place to maintain its effectiveness and prevent damage.
