

Ηλιακός λαμπτήρας Lepro WL4000

LEPRO · EAN 4894495032709

Machine translation from Polski. In case of doubt the manufacturer's original document prevails.

Environmental Protection

5s

Used electronic equipment marked in accordance with the European Union directive must not be

(Safety instructions and information)

disposed of together with other municipal waste. It is subject to selective collection and recycling

a. After turning the switch to the ON position, the lamp will light up for 5s and then turn off again, which

means that the light has been successfully activated. (If the lamp does not work, please place the lamp in a

location exposed to direct sunlight and charge it for 6-8h before the first use). Proper disposal prevents potential

negative consequences for the natural environment and human health. The collection system

means that the light has been successfully activated. (If the lamp does not work, please place the lamp in a

location exposed to direct sunlight and charge it for 6-8h before the first use). Detailed information on this can be obtained at the municipal office,

cleaning facility, or the store where the product was purchased. 640003-DW

(figure 1)

The product meets the requirements of the so-called New Approach directives of the European Union (EU) regarding

1 x

b. Choose a location exposed to direct sunlight. Recommended height: 1.8-2.5M. safety issues, health protection, and environmental protection,

defining hazards that should be detected and eliminated. (figure 2)

640003-DW-a-2

c. Hang the lamp on the base with the solar panel facing upwards. (figure 3)

This document is a translation of the original user manual created by the manufacturer. 2 x d. The lamp can be rotated up and down by 120 degrees. Two lamps attached to the left and right sides

can be rotated forward and backward by 120 degrees. (Note: All rotating parts should not be rotated

at too large an angle, which may cause disconnection of the internal circuit). (figure 4)

1.8-2.5 m

e.

After switching the switch to the ON position, the wall lamp lights up only when the ambient light level is lower than 20 Lux and human movement is detected. (figure 5) The product should be regularly maintained (cleaned) by the user or by specialized service points at the user's cost and responsibility. In the absence of information about necessary maintenance actions or service in the user manual, the user should regularly, at least once a week, assess the physical condition of the product against a physically new product. In case of detection or identification of any discrepancies, urgent maintenance (cleaning) or service steps should be taken. Failure to properly maintain (clean) and respond upon detection of a discrepancy may lead to permanent damage to the product. The warranty does not cover damage resulting from neglect.

f. After a full charge, the number of inductions is about 200 times (20 seconds each time). The light will automatically turn off after 20 seconds if no movement is detected within the detection range.

14 W, 3.7 V, 3.78 A, 6500 K, IP 65, -20 °C ~ 40 °C / -4 °F ~ 104 °F

g. The number of uses depends on the amount of electricity stored during the day, which is influenced by the intensity and duration of sunlight.

h. Temperature affects the sensitivity of the PIR sensor, causing a change in the detection range. The higher the temperature, the shorter the detection range.

i. If the light does not turn on after days of continuous rainy or cloudy weather, it is due to battery depletion. The light will function normally at night after a sunny day.

j. The light source in this fixture is not replaceable; when the light source reaches the end of its lifespan, it should be disposed of properly.

This product is subject to the provisions of the European Directive 2012/19/EU. The symbol of a crossed-out wheellie bin indicates that the product requires separate waste collection in the European Union. This applies to the product and all accessories marked with this symbol. Products marked with this symbol must not be disposed of with regular household waste, but must be handed over to a collection point designated for recycling electrical and electronic devices. This recycling symbol indicates, for example, an item or parts of material as valuable for recycling. Recycling helps reduce the consumption of raw materials and protect the natural environment. 120° Detection angle 120° 120°
