Machine translation from Polski. In case of doubt the manufacturer's original document prevails.

Magcubic HY350 Projector

Short user manual

Warning

Before use, carefully read this manual and keep it for future reference.

1. The projector is not resistant to dust or water.
2. To reduce the risk of fire and electric shock, do not expose the projector to rain or mist.
3. Use the original power supply. The projector should operate with the specified rated power supply.
4. When the projector is in operation, do not look directly into the lens, as the strong light may cause temporary blindness and slight discomfort. Children should use the projector under adult supervision.
5. Do not cover the projector's ventilation openings. Overheating will shorten the projector's lifespan and pose a hazard.
6. Regularly clean the projector's ventilation openings, as dust may cause improper functioning of the cooling system.
7. Do not use the projector in greasy, humid, dusty, or smoky environments; oil or chemicals may cause improper functioning.
8. Handle the device with care during daily use.
9. Disconnect the power supply if the projector will not be used for an extended period.
10. Unauthorized personnel are prohibited from disassembling the projector for testing or maintenance.

Product appearance

This manual is for informational purposes only. The content of the manual may change without prior notice. The company reserves the right to final interpretation.

BT Air Remote

Pairing the Bluetooth remote

Note: Bluetooth remote pairing process. Press the "Voice Input" button to display the pairing instructions.

Language settings

Settings – Language settings: enter to configure the language and select the text input method.

App Store

In the App Store, apps can be installed with a single click and used immediately after installation. Our company also launches apps, allowing users to easily and conveniently download and use them.

Settings

Go to: Display settings, Network settings, Bluetooth, App management, Language, Date and time, Other settings, System information.

Projection settings

Settings – Projector settings; enter to configure projection mode, installation mode, digital scaling, and manual keystone correction.

Network settings

Settings – Network settings – Wi-Fi settings, turn on Wi-Fi, select the appropriate Wi-Fi network, and enter the password to connect to the Internet.

BT settings

Settings – BT settings, BT "ON", click "Refresh devices" and select the device you want to pair with.

Setting the date and time

Settings – Date and time settings: go to the Date, Time options and select the 24-hour format.

Other settings

Settings – Other settings; press to go to power mode, auto-off after a specified time, and factory reset.

System information

Settings – System information: user interface version, resolution, amount of RAM, and disk space.

HDMI™ Signal

After connecting the projector to another output device, select the "HDMI Audio/Video" option.

Wireless screen

Ensure that Android devices (phone, tablet, etc.) are on the same local Wi-Fi network as these devices.

Actions on devices:

Home screen > My apps > ScreenCast > Open ScreenCast service — Enable connection for screen mirroring from the phone

Safety tips

- * Please pay attention to important information regarding the operation and maintenance of the projector. Carefully review this information to avoid issues. Following safety tips will extend the projector's lifespan.
- * For installation and repairs, consult qualified personnel; do not use damaged cables, accessories, or other peripheral devices.
- * Keep the projector away from flammable materials, explosives, strong electromagnetic interference (large radar stations, power plants, substations), etc. Strong ambient light (avoid direct sunlight), etc.
- * Do not cover the projector's ventilation openings.
- * Please use the original power supply.
- * Ensure proper ventilation and make sure that the ventilation openings are not covered to avoid overheating the projector.
- * Do not look directly into the lens while the projector is in operation, as strong light may cause temporary blindness and slight discomfort.
- * Do not bend or pull the power cord.
- * Do not place the power cord under the projector or any heavy objects.
- * Do not cover the power cord with other soft materials.
- * Do not heat the power cord.
- * Avoid touching the power supply with wet hands.

All information regarding product usage can be found in the user manual. Before you start using it, familiarize yourself with its content and follow the instructions provided.

Before use, also review the following information:

Usage warnings

Risk of product damage:

- Ensure that the projector is connected to a power source that meets the device's technical specifications. Using inappropriate adapters or cables may damage the device.
- Portable projection screens should be set up on a stable surface to prevent tipping over. The mount or stand must be properly installed according to the user manual.
- When transporting projectors or screens, avoid shocks and impacts that may damage the lens, projector matrix, or screen deployment mechanism.

Risk of overheating:

- Ensure that the projector is used in a location with adequate ventilation. Never cover the ventilation openings or use the device near flammable materials.
- Provide at least 20 cm of free space around the projector for proper cooling.

Hazard to children and unqualified users:

- Projectors emit an intense beam of light that can be dangerous to eyesight, especially for children. Ensure that children do not look directly into the lens while the device is in operation.
- Portable projection screens, especially larger models, may be unstable. Do not allow children to play near the stands or attempt to fold and unfold the screens, as this may lead to tipping over and injuries.
- Projector accessories, such as remotes, adapters, or connectors, contain small parts that may pose a choking hazard. Store these items out of reach of children.
- When using the projector or screen, ensure that power and signal cables are properly routed and secured to prevent children from tripping or damaging the devices.
- Projectors and screens are not toys. Never allow children to operate devices that require technical knowledge and caution without supervision.
- Ensure that the projector is placed on a stable surface out of reach of children to prevent accidental tipping.

Compatibility:

- Ensure that devices such as computers, laptops, or players are compatible with the standards supported by the projector (e.g., HDMI, USB-C, Wi-Fi).
- Match the projector's resolution and aspect ratio to the projection screen (e.g., 16:9 or 4:3) to avoid distortion.

Environmental hazard:

- Used projectors, screens, and accessories should be disposed of properly at e-waste collection points, in accordance with local environmental protection regulations. Avoid throwing them in regular waste bins to prevent harmful effects on the environment.

Information on proper usage

Recommendations for use:

- Use the projector in a dimly lit room for the best image quality.
- Set the projector at the recommended distance from the screen. Details can be found in the product user manual.
- Adjust brightness, contrast, and focus according to lighting conditions and projection size.
- Use screens according to the manufacturer's instructions, avoiding excessive tension on the material, which may lead to damage.
- Ensure that the projector has adequate space around the ventilation openings. Avoid covering these openings to prevent overheating.
- Do not use the projector for extended periods without breaks. In case of intensive use, take breaks to allow the device to cool down.

Maintenance and storage:

- Regularly clean the projector lens and screen surface with a soft, dry cloth. Do not use chemicals that may damage the device.
- Store projectors and screens in a dry, cool place. Protect them from moisture, dust, and direct sunlight.
- When transporting, use dedicated covers or cases to protect the device from shocks and mechanical damage.

Additional precautions

User customization:

- Choose a projector and screen suited to your needs, such as business presentations, home cinema, or gaming. Pay attention to parameters such as brightness (lumens) and resolution.
- If the projector supports smart features, such as streaming apps, ensure that your device is compatible with these features.

Damage and service:

- In case of damage, such as cracks in the casing, difficulties in displaying images, or power issues, immediately stop using it and contact an authorized service center.
- Do not attempt to repair the projector or screen yourself. Only authorized service will ensure compliance with warranty conditions.
- Check the condition of cables, connectors, and the projector lamp. Replace them with original manufacturer parts if worn.

Declaration of conformity

The products have been designed in accordance with the safety requirements specified in Regulation (EU) 2023/988. They meet the relevant technical standards, including those concerning electromagnetic compatibility (EMC), electrical safety, and protection of users from mechanical and environmental hazards.

SIMPLIFIED EU DECLARATION OF CONFORMITY

HENZHEN HANYING INTERNATIONAL IMPORT&EXPORT CO.,LTD hereby declares that the type of radio equipment Magcubic HY350 Projector is compliant with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following web address: <https://files.in-npro.pl/magcubic>

Manufacturer's address: Office: 13A10, Shuntai Zhongsheng Tower,
Longguan Road,
Longhua District, Shenzhen

Radio frequency: 2400MHz-2483.5MHz

Maximum radio frequency power: <20dBm

Environmental protection

Used electronic equipment marked in accordance with the European Union directive must not be placed together with other municipal waste. It is subject to selective collection and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The waste collection system for used equipment complies with local environmental protection regulations regarding waste disposal. Detailed information on this can be obtained from the municipal office, waste management facility, or the store where the product was purchased. The product meets the requirements of the so-called New Approach directives of the European Union (EU), concerning issues related to user safety, health protection, and environmental protection, specifying hazards that should be detected and eliminated.

This document is a translation of the original user manual created by the manufacturer.

Detailed information about the distributor's / manufacturer's warranty conditions is available at the website <https://serwis.innpro.pl/gwarancja>

The product should be regularly maintained (cleaned) by the user or through specialized service points at the user's cost and responsibility. If there is no information about necessary maintenance actions or service in the user manual, the user should regularly, at least once a week, assess the physical condition of the product against that of a physically new product. If any deviation is detected or noted, urgent maintenance (cleaning) or service steps should be taken. Failure to properly maintain (clean) and respond upon detecting a deviation may lead to permanent damage to the product. The warranty provider is not responsible for damages resulting from neglect.
