Gaming Microphone Maono

DM30RGB

User Manual

Product Description

DM30RGB is a next-generation digital microphone. It features a unique single-arm design and uses a capacitive diaphragm that captures every nuance of vocals and musical instruments. The product includes a unique 3-in-1 digital knob that controls the mute switch, microphone gain, and headphone volume. Advanced sound processing features are available through the Maono Link software on Windows/Mac, providing users with greater versatility. Gamers and other users will also appreciate the RGB lighting at the base of the microphone, which can be controlled via a button and programmed through the Maono Link software.

Product Features

- Cardioid polar pattern
- High-sensitivity sound recording
- Microphone gain control
- Real-time monitoring
- Headphone volume adjustment
- Accompanying software
- Fully metal housing

Specification

Type of receiving device: Transducer

Settings are synchronized in real-time between hardware and software. Standard

Offers a set of simple and intuitive audio settings, sound effects, and RGB personalization.

Advanced

Offers more advanced audio settings. You can use a combination of equalizer, limiter, and compressor to adjust your voice. The RGB lighting setting is still available in Pro mode. You can go to the settings menu in the upper right corner to check for software updates.

RGB Lighting Setting

Enabling the feature allows you to adjust brightness and customize the light. Disabling the feature will turn off the settings.

Environmental Protection
Used electronic equipment marked according to the European Union directive must not be disposed of together with other municipal waste. It is subject to selective collection and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The collection system for used equipment complies with locally applicable environmental regulations regarding waste disposal. Detailed information on this can be obtained from the municipal office, waste management facility, or the store where the product was purchased. The product meets the requirements of the so-called New Approach directives of the European Union (EU) regarding safety, health protection, and environmental protection, specifying hazards that should be detected and eliminated. This document is a translation of the original user manual created by the manufacturer. Detailed information about the distributor/manufacturer warranty conditions is available on the website

<https://serwis.innpro.pl/gwarancja>

The product should be regularly maintained (cleaned) by the user or through specialized service points at the user's cost and responsibility. In the absence of information about necessary periodic or service maintenance actions in the user manual, the user should regularly, at least once a week, assess the physical condition of the product against that of a physically new product.

In the event of detecting or identifying any irregularity, urgent maintenance (cleaning) or servicing steps must be taken. Failure to perform proper maintenance (cleaning) and to respond promptly upon detection of an irregular condition may lead to permanent damage to the product. The warranty provider is not responsible for damages resulting from negligence. Importer: INNPRO Robert Błędowski sp. z o.o. ul.
