User Manual

OBSBOT Tail Air ND Filter Set

Description

The OBSBOT Tail Air ND Filter Set has been designed for users of the OBSBOT Tail Air camera who want to achieve a more cinematic look for their recordings and better control over exposure in various lighting conditions. The set includes ND4, ND8, ND16, and ND32 filters, which limit the amount of light entering the lens at different levels. This makes it easier to avoid overexposure, reduce glare, and maintain natural motion in the image even when recording in full sunlight. The filters are magnetically mounted, allowing for quick changes depending on working conditions without interrupting the recording.

Intended Use

For safety and certification reasons, the product must not be modified or altered in any way. Using the product for purposes other than those described may result in damage to the product. Additionally, improper use may pose hazards. Please read the user manual carefully and keep it for future reference. It is essential to read and follow the safety instructions contained in the manual.

1. The product is not a toy. Keep it out of reach of children and pets.
2. Protect the product from extreme temperatures, direct sunlight, strong vibrations, high humidity, moisture, flammable gases, vapors, and solvents.
3. Do not subject the product to mechanical stress.
4. If safe operation is no longer possible (the product is damaged, not functioning correctly), discontinue use and secure the product against reuse.
5. Handle the product with care. Shocks, impacts, or dropping the product may cause damage.
6. If there are any doubts regarding operation or safety, consult a qualified professional.
7. If you have any questions that are not answered in this manual, please contact our customer service office (email: hurt@innpro.pl, website: <https://innpro.pl/>) or another specialist.
