Instructions for use

Congratulations on your purchase of our new stereo 2.0 RGB speakers! This product is intended for indoor use only, please do not use it outdoors. Any contact with water must be avoided (do not use these in a bathroom). For your safety, avoid dismantling/re-mantling/modifying this product. Using this product for any purpose other than those intended may end up damaging your product. Improper use may cause dangers such as short circuiting, fire, or electric shock. Please read the following instructions carefully.

Features

Portable Stereo Sound System

Thanks to its 2-by 5W power, the closed cavity and air duct design brings you a pleasant and clear stereo sound experience, turning your desktop or laptop into the ultimate sound system. These unique and stylish USB-powder gaming speakers will fill your room with the sound of your favorite games, music, and movies.

Power Control Mode

1. Press to turn on/off
2. Click to switch light mode
(gradient, flowing, rotating, red, green, blue, light off)
3. Click twice to switch Bluetooth/aux mode (default aux mode)
4. Rotate for volume adjustment

BLUETOOTH MODE

T1.Press the knob to turn on. The default mode is AUX mode.Short press twice to switch between Bluetooth/AUX mode. Turn on the mobile phone or computer Bluetooth device and search for the corresponding Bluetooth device named "L6", and then click "Connect". After the pairing connection is completed, there will be a prompt tone. Then you can play music.

2. After connecting with the mobile phone once, Bluetooth has its memory . Turning on the bluetooth of the mobile phone, it can be connected automatically or manually according to different types of mobile phones. If it needs to be disconnected, you can disconnect the Bluetooth settings through the mobile phone or computer Bluetooth device

3. Insert AUXN and press the knob twice to switch to AUX mode.

Easy installation

Plug and play! Use the USB cable to connect your computer in order to supply the required power, and the 3.5mm audio cable to the AUX jack. We designed these speakers for use with almost every device, thanks to its standard 3.5mm audio jack and USB port you can connect these to your desktop, laptop, projector, monitor, PC, TVs, etc.

Widely Compatible

The built in USB core and universal 3.5mm AUX interface allows you to hook up our multimedia speakers to work the most common brands such as Mac book, ASUS, Lenovo, ThinkPad, HP, Samsung, Dell, Acer, LG, Google Chromebook, Microsoft Surface, etc.

【Note】 Please note that, while we push for universal support, some devices such as Android Smartphones, iPhones, Sony PlayStation's and Microsoft Xbox series may not be compatible.

Safety Information

Read the operating instructions and safety information carefully. If you do not

follow the safety instructions and information on proper handling in this manual,

we will assume no liability for any resulting personal injury or damage to property.

Such cases will invalidate the warranty/guarantee.

a) General information

- This product is not a toy. Keep it out of the reach of children and pets.

- Do not leave packaging material lying around carelessly, as it may become dangerous playing material for children.

- Protect the product from extreme temperatures, direct sunlight, strong jolts, high humidity, moisture, flammable gases, vapour and solvents.

- Do not place the product under any mechanical stress.

- It is no longer possible to operate the product safely, stop using it and prevent unauthorized use. Safe operation can no longer be guaranteed if the product:

- is visibly damaged,

- is no longer working properly,

- has been stored for extended periods in poor ambient conditions or

- has been subjected to any serious transport-related stress.

- Always handle the product carefully. Jolts, impacts or a fall even from a low height may damage the product.

Always observe the safety and operating instructions of any other devices which are connected to the product.

- Consult a technician if you are not sure how to use or connect the product.

- Maintenance, modifications and repairs must be done by a technician or unauthorized repair centre.

- If you have questions which remain unanswered by these operating instructions, contact our technical support service or other technical personnel.

b) Electrical safety

- Never touch or operate the product if your hands are moist or wet. This may result in a fatal electric shock!
- Never pour any liquids over electrical devices or place objects filled with liquid next to the product. If liquid or an object does enter the interior of the device, power down the respective socket (e.g. switch off the circuit breaker), and then remove the mains plug from the mains socket. Discontinue use and take the product to a specialist repair centre.
- Never use the product immediately after it has been brought from a cold room into a warm one. The condensation generated may destroy the product, and the power adapter may cause a fatal electric shock. Allow the product to reach room temperature before connecting it and putting it to use. This may take several hours.
- Do not touch the power adapter if there are any signs of damage, as this may cause a fatal electric shock! Switch off the mains voltage to the socket to which the power adapter is connected (switch off at the corresponding circuit breaker or remove the safety fuse, and then switch off at the corresponding RCD protective switch). You can then unplug the power adapter from the mains socket. Dispose of the faulty power adapter in an environmentally friendly manner and discontinue use. Replace it with a power adapter of the same design.
- The mains outlet must be located near to the device and be easily accessible.. Always power the product using the power adapter provided.
- Only connect the power adapter to a standard mains socket connected to the public grid. Before plugging in the power adapter, check that the voltage stated on the power adapter is the same as the voltage of your electricity supplier.
- Never connect or disconnect the power adapter when your hands are wet.
- Never unplug the power adapter from the mains socket by pulling on the cable; always use the grips on the plug.
- When setting up the product, make sure that the cables are not pinched, kinked or damaged by sharp edges.
- Always lay the cables so that nobody can trip over or become entangled in them. This may cause an injury.
- For safety reasons, disconnect the power adapter from the mains socket during storms.

c) Persons and product

- -Do not listen to excessively loud music over an extended period, as this can cause hearing damage.

Care and Cleaning

- Always disconnect the product from the power supply before cleaning it.
- Never use aggressive detergents, rubbing alcohol or other chemical solutions, as these may damage the casing or cause the product to malfunction.
- Use a dry, lint-free cloth to clean the product.
- Do not immerse the product in water.

Disposal

Electronic devices are recyclable and must not be placed in household waste. Always dispose the product according to the relevant statutory regulations.

You thus fulfill statutory obligations and contribute to the protection of the environment.

Explanation of symbols

The symbol with the lightning in the triangle indicates that there is a risk to your health, e.g. due to an electric shock!

This symbol is used to highlight important information in these operating instructions. Always read this information carefully.

This symbol indicates special information and advice on how to use the product.

This product must only be used in dry, enclosed indoor areas. It must not become damp or wet, as this may result in a fatal electric shock!
