PROFESSIONAL GAMING HEADSET

SHENZHEN OUNI TECHNOLOGY CO.,LTD.

WWW.ONIKUMAGAMING.COM

1. Excellent high/medium/bass tone quality.

2. The soft materials of the ear pads are perfect for wearing the headset for a long time, as well as improving sound and water isolation

3. The earphones are designed with light materials and thanks to the adjustable headband are truly focused on a comfortable gaming experience.

4. The highly sensitive microphone provides more accurate, clearer and smoother sounds

5. Headphone Volume+

7. Headphone Volume-

9. Micro Usb

6. MFB Button

8. Power Switch Key Button

10. 3.5 Audio Interface

1. Rotate the headset and find a suitable position
 2. Extend the headset arms and find the right height
 3. Make sure ear pads provide a tight seal around the ears
 4. Make sure the headrest fits closely with the top of the head.
- We recommend not pulling the headphone cups as far apart as possible, gently pull them so that they fit on your head, then adjust the height.

How to use

Connecting to Bluetooth

1. When the headset is powered, please turn the power switch to the "ON" direction and a "power on" prompt will sound. Then the blue light of the power indicator will be on for 2 seconds before turning to red and blue lights alternately flashing , The headset enters the Bluetooth search pairing state at this time.
2. In order to pair, search for the headset name "B90" in your Bluetooth device list. Upon successful pairing you should hear the "connected" prompt.
3. The headset will remember previously paired devices. When a new connection is made, you only need to turn on the Bluetooth of the device you do not want to connect to. Similarly, the headset will automatically connect to the most recently connected device. Please note that if there is no return connection, you should find the headset in the Bluetooth list and select "B90" to connect again.
4. If the headset is stuck during use or other functions cannot be used normally, pull the power switch to the OFF side, and charge the headset correctly. After 2 seconds, restart the headset to restore the headset function.

Mic Hole

Enter the Bluetooth search pairing mode, the red and blue lights flash alternately. When the pairing is successful, the light is off, and the blue light in the working mode flashes once every 3 seconds)

Using the cable to connect

The headset can be connected to your preferred device by directly plugging in via the cable. If the headset is in Bluetooth state, the headset will automatically power off and enter line-in mode.

Charging the headset

The earphones are partially charged at the factory, please make sure they are fully charged before using them for the first time.

1. The earphone has a built-in battery, so it should be charged at least once every 2 months if it is not used for a long time.
2. The package is equipped with a micro usb head charging cable, which can be charged by plugging in the power supply (adapted charger 5V1A).
3. The red light is always on to indicate the start of charging.

Headphone Indicator

The red light is always on to indicate the start of charging.

The light will go off when the battery is fully charged.
