Professional Gaming Headset

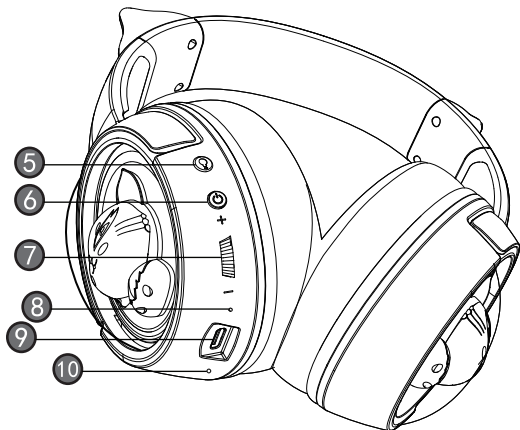

USER MANUAL

product description

EN

1. Excellent high/medium/bass tone quality.
2. The soft materials of the ear pads are perfect for wearing the headset for a long time, as well as improving sound and water isolation
3. The earphones are designed with light materials and thanks to the adjustable headband are truly focused on a comfortable gaming experience.
4. The highly sensitive microphone provides more accurate, clearer and smoother sounds

5. Light key

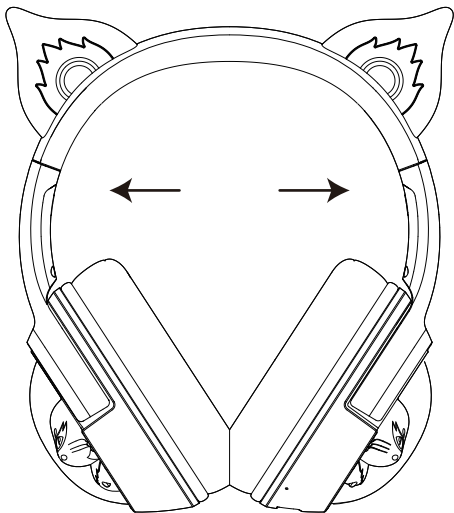

6. Power key

7. Volume wheel

8. Headphone indicator light

9. Type-c

10. MIC

1. Rotate the headset and find a suitable position
2. Extend the headset arms and find the right height
3. Make sure ear pads provide a tight seal around the ears
4. Make sure the headrest fits closely with the top of the head.

We recommend not pulling the headphone cups as far apart as possible, gently pull them so that they fit on your head, then adjust the height.

How to use

Connecting to Bluetooth

1. When the headset is powered on, press the button for 3s and a 'power on' prompt will sound. The power indicator will then emit a blue light for 1.5seconds, and then change to flashing between red and blue, indicating that Bluetooth is now in pairing mode.
2. In order to pair, search for the headset name "B5" in your Bluetooth device list. Upon successful pairing you should hear the "connected" prompt.
3. The headset will remember previously paired devices. When a new connection is made, you only need to turn on the Bluetooth of the device you do not want to connect to. Similarly, the headset will automatically connect to the most recently connected device. Please note that if there is no return connection, you should find the headset in the Bluetooth list and select "B5" to connect again.
4. If you want to change the device while there is a connection record, you can reset the headset to clear the connection record information. (Reset the headset: Press and hold the power button for about 8 seconds under the power off state, and you will hear a "beep" prompt to complete the reset.)

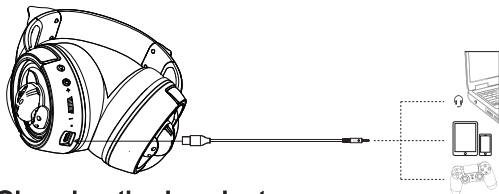

Enter the Bluetooth search pairing mode, the red and blue lights flash alternately.

The pairing is successful and the blue light is always on)

Using the cable to connect

The headset can be connected to your preferred device by directly plugging in via the cable. If the headset is in Bluetooth state, the headset will automatically power off and enter line-in mode.

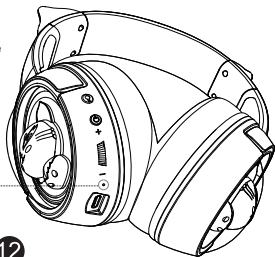

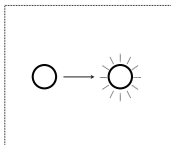

Charging the headset

The headset is partially charged at the factory, but please ensure that you fully charge them before first use.

- 1.The headset has a built-in battery, but if you end up not using it all too often, please make sure to charge the headset at least once to full every three months.
- 2.The headset comes with a USB type-c charging cable, charge through Type-c port or with a 5V/1A charger.
3. The red light is on when the headset is charging.The indicator light is off when the headset is fully charged.

The red light is always on when the headset is charging, and the light turns off when it is fully charged.
