Professional Gaming Headset

USER MANUAL

Product description

1. High quality high, medium and low sound quality experience;
2. The ear cups are made of soft, comfortable material, better isolation from the surrounding environment, waterproof, comfortable to wear;
3. Headset selection of light material design, adjustable headband design, focusing on the game wearing experience;
4. Highly sensitive microphone makes sound transmission more accurate, clearer and smoother;

1. Volume wheel

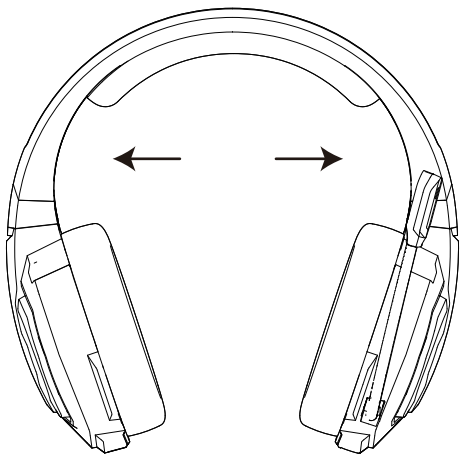

2. Light key

3. Power button

4. Type-c charging/audio cable interface

5. Indicator light

6. Mic lever

- 1. Rotate the headset and find the right position
- 2. Stretch the headset arm and find the right height.
- 3. Ensure that the ear cushions are tightly fitted and sealed to the ears.
- 4. Ensure that the head cushion fits tightly on the top of the head.

We recommend gently pulling the headset away from your head and then placing it on your head to adjust the height.

But please avoid overstretching the headset beyond its technical limitations

How to use

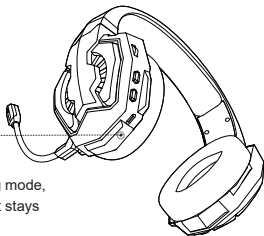

Connect Bluetooth using device

1. When the earphones are powered, pressing the power button for 3 seconds will sound a "power on" prompt. Next, the blue power indicator light will light up for 1.5 seconds and then turn to red and blue flashing alternately. At this time, the earphones will enter Bluetooth search pairing mode.
2. At this point, please find the Bluetooth name "B15" in the device Bluetooth list, click on "connect", and the earphones will prompt "connected" after successful connection.
3. The earphones can remember the previously paired devices. When making a secondary connection, simply turn on the Bluetooth in the device and the earphones will enter the power on state. It will automatically reconnect with the device (if not, please find the Bluetooth name in the Bluetooth list and click to connect).
4. If you want to replace the paired device in a connected state, you can force the earphones to enter pairing mode (Bluetooth: in power on state, press and hold the power button five times to clear pairing information and then turn off 2.4G: in power on state, long press the power button for 10 seconds and then turn on again. The green light will flash quickly and insert Dongle to re pair.)

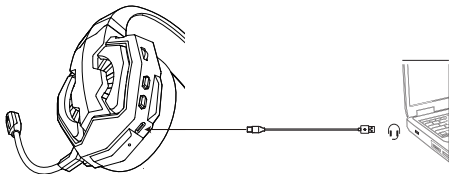

Enter Bluetooth search and pairing mode, the blue light flashes, The blue light stays on when pairing is successful.

Enter 2.4G search and pairing mode, the green light flashes, The green light stays on when pairing is successful.

Line mode (optional)

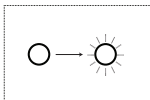

The earphones and devices can work directly by inserting a Line cable. If the earphones are in Bluetooth mode, the earphones will automatically shut down and enter Line cable working mode after inserting the Line cable

Charging the headset

The headphones are partially charged at the factory, please make sure they are fully charged before first use.

1. The headset has a built-in battery. If it is not used for a long time, it should be charged at least once every three months. The blue light flashes to indicate a low battery state.
2. The package is equipped with a Type-c charging cable, which can be charged when plugged in (adaptive charger 5V/1A)
3. The red light of the earphones is always on when charging, and turns off when fully charged.
