Wireless Settings

Use device to connect Wireless

1. When the headset is powered, press the power button for 3S to emit a "power on" prompt tone, and then the power indicator blue light flashes, and the headset enters the Wireless search pairing state.
2. At this time, please find the headset Wireless name "GT811" in the device Wireless list, click to connect, and the headset will prompt "connected" after the connection is successful.
3. The headset can remember the previously paired devices. When making a second connection, you only need to turn on the Wireless in the device, and the headset will automatically reconnect to the device (if it does not reconnect, please find the Wireless name in the Wireless list and click to connect).
4. If you want to change the paired device in the connected state, you can force the headset to enter pairing mode (Wireless: press and hold the "power button" for 5 seconds to force it into pairing mode)

(Image text content
Enter Wireless search pairing mode,
Green and white lights flash
alternately.
When pairing is successful,
the white light flashes slowly)
