How to use

Connecting Wireless

1. Pressing the power button for 3 seconds while the earphones are charged will emit a "power on" sound, followed by a flashing blue light on the power indicator. At this point, the earphones enter Wireless search pairing mode.
2. At this point, please find the Wireless name "GT828" for the earphones in the device Wireless list, click on connect, and after successful connection, the earphones will prompt with a "connected" sound
3. The earphones can remember the previously paired devices, and when making a secondary connection, simply turn on the Wireless in the device. At the same time, the earphones will enter the power on state, and it will automatically reconnect with the device (if there is no reconnection, please find the Wireless name in the Wireless list and click to connect).
4. If you want to change the paired device when the headset is connected, you can force the headset to enter pairing mode (press the power button five times in a row when the headset is powered on (connected or not connected) to clear the pairing and then turn off the headset).

Enter the wireless search pairing mode, the blue light flashes and the blue light stays on when the pairing is successful.

Double-click the light button (Wireless--Blue light stays on 2.4G--Green light stays on)
