

Προσαρμογέας φόρτισης USB-C για γυαλιά RayNeo AR

RayNeo · EAN 6976972040181

Machine translation from Polski. In case of doubt the manufacturer's original document prevails.

This document is a translation of the original user manual created by the manufacturer. Detailed information about the distributor/manufacturer warranty conditions is available on the website <https://serwis.innpro.pl/gwarancja>. The product should be regularly maintained (cleaned) at the user's expense and discretion, or by specialized service points. In the absence of information about necessary periodic or service maintenance actions in the user manual, the physical condition of the product should be assessed regularly, at least once a week, against that of a physically new product. If any deviation is detected or identified, urgent maintenance (cleaning) or service steps should be taken. Failure to properly maintain (clean) and respond upon detecting a state of deviation may lead to permanent damage to the product. The guarantor is not responsible for damages resulting from negligence.

Warnings and safety information

All information regarding the use of the products is contained in the attached user manual. Before using the products, familiarize yourself with its content and follow the manufacturer's recommendations. Also, review the following information before use:

Usage warnings

Risk of device damage:

- AR glasses and adapters should only be used according to their intended purpose and the instructions contained in the user manual.
- Avoid exposing devices to extreme temperatures, moisture, and direct sunlight to prevent damage to electronic components.
- Do not connect adapters to incompatible devices to avoid the risk of damage.

User hazards:

- Do not use AR glasses while driving, operating machinery, or in other situations requiring full attention – this may lead to accidents.
- Before prolonged use, ensure that the glasses fit well and do not cause discomfort to avoid eye strain or headaches.
- Avoid looking directly at intense AR display light for extended periods to protect your eyesight.

Power and connection risks:

- Adapters should only be connected to recommended power sources and cables. Do not use damaged wires or chargers.
- Before connecting the adapter, ensure that the power socket is clean and free from contaminants.

Information on proper usage

Preparation and setup:

- Before the first use of the AR glasses, install the necessary software or applications indicated by the manufacturer.
- If the glasses require connection to an adapter, ensure that the adapter is properly connected to a compatible device (e.g., computer, smartphone, or console).
- Adjust the AR glasses to your needs using the available adjustments.

Safe usage:

- Take regular breaks during use to avoid overloading your eyesight and nervous system.
- Avoid using devices during intense movement to prevent disorientation or loss of balance.

Maintenance:

- After each use, clean the glasses with a soft, dry cloth to remove fingerprints and dust. For adapters, use a dry cloth to clean the ports and casing.

Additional precautions

- Protection of displays and lenses: Regularly check that the lenses and displays are clean and free from scratches to ensure the highest image quality.
- Adapters: If you notice any issues with the adapter's operation (e.g., overheating, intermittent connection), immediately disconnect it from the power source and contact the manufacturer's service.
- Storage: Store the glasses and adapters in a dry place, in the original case or protective cover, to prevent damage.

Declaration of conformity

The AR glasses and adapters have been designed in accordance with the safety requirements specified in Regulation (EU) 2023/988. They meet the requirements for electromagnetic compatibility (EMC), electrical safety, and user ergonomics.

Safety measures

Before charging, check that the device contacts are clean. Never leave the device

unattended during use and charging. Ensure that you can quickly disconnect the device from the power source in an emergency. Never expose the device to high temperatures. Charge the device in a dry and well-ventilated area away from flammable materials, maintaining a minimum distance of 1m from other objects. Never cover the device while charging. Never use a power supply, charging station, cables, etc., without the manufacturer's recommendation and certification. Take care of your property; the device is equipped with cells that are difficult to extinguish, so equip yourself with a fire blanket.

LI-ION Battery

The device is equipped with a LI ION (lithium-ion) battery, which due to its physical and chemical structure ages over time and with use. The manufacturer specifies the maximum operating time of the device under laboratory conditions, where optimal working conditions for the device exist, and the battery itself is new and fully charged. The actual operating time may differ from the declared in the offer and this is not a defect of the device but a feature of the product. To maintain the maximum lifespan of the battery, it is not recommended to discharge it below 3.18V or 15% of the total capacity. Lower values, such as 2.5V for the cell, permanently damage it and this is not covered by warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and the charge level should be checked periodically every two months. Store the battery and device in a dry place, away from sunlight and negative temperatures.

LI-PO Battery

The device is equipped with a LI PO (lithium-polymer) battery, which due to its physical and chemical structure ages over time and with use. The manufacturer specifies the maximum operating time of the device under laboratory conditions, where optimal working conditions for the device exist, and the battery itself is new and fully charged. The actual operating time may differ from the declared in the offer and this is not a defect of the device but a feature of the product. To maintain the maximum lifespan of the battery, it is not recommended to discharge it below 3.5V or 5% of the total capacity. Lower values, such as 3.2V for the cell, permanently damage it and this is not covered by warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and the charge level should be checked periodically every two months. Store the battery and device in a dry place, away from sunlight and negative temperatures.

Environmental Protection

Used electronic equipment marked in accordance with the European Union directive must not be disposed of together with other municipal waste. It is subject to selective collection

and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The system for collecting used equipment complies with locally applicable environmental protection regulations regarding waste disposal. Detailed information on this topic can be obtained at the municipal office, cleaning plant, or the store where the product was purchased. The product meets the requirements of the so-called New Approach directives of the European Union (EU) concerning issues related to user safety, health protection, and environmental protection, specifying hazards that should be detected and eliminated.
