Intelligent Pet Feeder

Rojeco 2L Pet Feeder Button

Version

User Manual

Description

For safety and certification reasons, the device must not be modified or altered in any way. Using the product for purposes other than those described may result in damage to the product. Furthermore, improper use may pose hazards. Please read the user manual carefully and keep it for future reference.

Safety Instructions

You must read and follow the safety instructions contained in the manual.

1. The product is not a toy. Keep it out of the reach of children and pets.
2. Protect the product from extreme temperatures, direct sunlight, strong vibrations, high humidity, moisture, flammable gases, fumes, and solvents.
3. Do not expose the product to mechanical loads.
4. If safe operation is no longer possible (the product is damaged, not functioning properly), discontinue use and secure the product against further use.
5. Handle the product with care. Shocks, impacts, or dropping the product may cause damage.
6. If there are any doubts regarding the operation, safety, or connection of the product, consult a qualified professional.
7. If you have any questions that are not answered in this manual, please contact our customer service office or another specialist.

2L Capacity

The Rojeco intelligent pet feeder offers a capacity of up to 2L, which can provide food for cats or small dogs for up to 10 days. You can therefore go on vacation without worry, knowing that your beloved pet is well-fed even in your absence.

Meal Planning

Plan a feeding schedule tailored to your pet's needs. The Rojeco intelligent feeder provides your pet with 1 to 6 meals throughout the day, which can consist of up to 16 portions of food.

2 Power Supply Options

You can power the device in 2 ways – using the included USB cable or equipping it with 4 AA batteries (sold separately). In case of a power failure, the feeder automatically switches to emergency power mode so that your four-legged friend can eat meals at regular times.

Practical Lock and Convenient Operation

The practical lock eliminates the risk of accidental opening of the lid by your pet. To refill the food, use the dedicated switch. This solution ensures that your pet adheres to a healthy diet and does not snack between meals. Additionally, practical buttons and a readable display facilitate operation.

You must read and follow the safety instructions contained in the manual. Included in the package:

1. The product is not a toy. Keep it out of reach of children and pets. Food bowl
2. Protect the product from extreme temperatures, direct sunlight, strong vibrations, high humidity, moisture, flammable gases, vapors, and solvents. Tray for the bowl
3. Do not expose the product to mechanical loads. USB cable 1.5 m long
4. If safe operation is no longer possible (the product is damaged, does not function properly), discontinue use and secure the product against reuse. Adapter EU
5. Handle the product with care. Shocks, impacts, or dropping the product may cause damage. Model: RWSQ-02
6. If there are any doubts regarding the operation, safety, or connection of the product, consult a qualified professional. Capacity: 2 l
7. If you have any questions that are not answered in this manual, please contact our customer service office or another specialist. Input: DC 5V 1A

Power supply: 4 AA batteries (not included)

Material: ABS

Dimensions: 250 x 166 x 285 mm

Weight: approximately 1 kg

Environmental Protection

Used electronic equipment marked in accordance with the European Union directive must not be disposed of together with other municipal waste. It is subject to selective collection

and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The waste collection system for used equipment complies with locally applicable environmental protection regulations regarding waste disposal. Detailed information on this can be obtained from the municipal office, cleaning facility, or the store where the product was purchased. The product meets the requirements of the so-called New Approach directives of the European Union (EU) concerning issues related to user safety, health protection, and environmental protection, identifying hazards that should be detected and eliminated. This document is a translation of the original user manual created by the manufacturer. Detailed information about the distributor/manufacturer warranty conditions is available on the website <https://serwis.innpro.pl/gwarancja>

The product should be regularly maintained (cleaned) by the user or through specialized service points at the user's cost and scope. In the absence of information about necessary periodic or service maintenance actions in the user manual, the physical condition of the product should be assessed regularly, at least once a week, against that of a physically new product. If any deviation is detected or identified, urgent maintenance (cleaning) or service steps should be taken. Failure to perform proper maintenance (cleaning) and respond when a deviation is detected may lead to permanent damage to the product. The warranty does not cover damages resulting from neglect. **Safety Measures**

Before starting to charge, check if the device contacts are clean. Never leave the device unattended while in use and charging. Ensure that you can quickly disconnect the device from the power source in an emergency. Never expose the device to high temperatures. Charge the device in a dry and well-ventilated area away from flammable materials, maintaining a minimum distance of 1m from other objects. Never cover the device while charging. Never use a power supply, charging station, cables, etc., without the manufacturer's recommendation and certification. Take care of your property; the device is equipped with cells that are difficult to extinguish, so have a fire blanket on hand. **LI-ION Battery**

The device is equipped with a LI-ION (lithium-ion) battery, which ages over time and with use due to its physical and chemical structure. The manufacturer specifies the maximum operating time of the device under laboratory conditions, where optimal working conditions for the device exist, and the battery is new and fully charged. Actual operating time may differ from that declared in the offer and this is not a defect of the device but a characteristic of the product. To maintain maximum battery life, it is not recommended to discharge it below 3.18V or 15% of total capacity. Lower values, such as 2.5V for the cell, permanently

damage it and this is not covered by the warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and its charge level should be checked periodically every two months.

Store the battery and the device in a dry place, away from sunlight and negative temperatures. **LI-PO Battery** The device is equipped with a LI PO (lithium-polymer) battery, which, due to its physical and chemical structure, ages over time and with use. The manufacturer specifies the maximum operating time of the device under laboratory conditions, where optimal working conditions for the device exist, and the battery itself is new and fully charged. Actual operating time may differ from that stated in the offer and this is not a defect of the device but a characteristic of the product. To maintain the maximum lifespan of the battery, it is not recommended to discharge it below 3.5V or 5% of the total capacity. Lower values, such as 3.2V for the cell, can permanently damage it and this is not covered by the warranty. In case of discontinuing the use of the battery or the entire device for more than one month, the battery should be charged to 50% and its charge level should be checked periodically every two months. Store the battery and the device in a dry place, away from sunlight and negative temperatures.
