

ROJECO

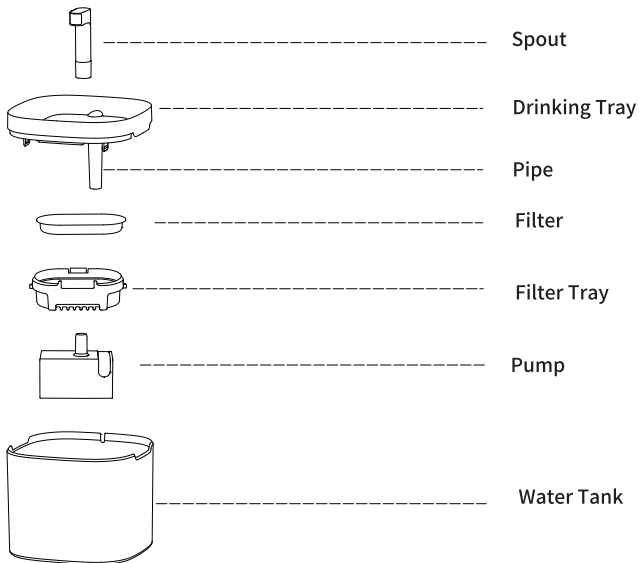

1.5L Pet Water Fountain

User Manual

Caution

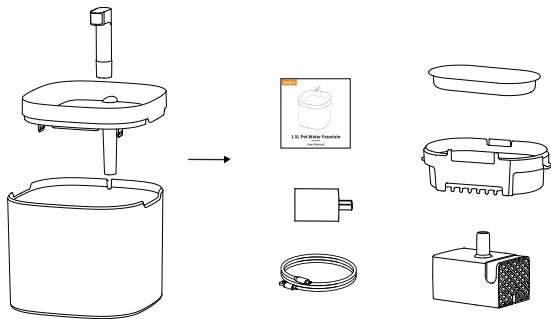

- Place the fountain where your pet can reach. Fill water into the fountain and make sure the water level is between the MAX and MIN marks. The pump must be immersed in water completely.
- The filter must be fully soaked for 5-10 minutes before you turn on it; Otherwise, the water may not diffuse through the filter and cause overflow.
- Please clean the product before using.
- Please clean the fountain and the pump every week.
- Replace the filter every 2 to 4 weeks or when the flow of water decreases.
- If you have multiple pets at home, the water tray and water tank may be sticky because of their saliva. Please replace the cleaning water and clean the inner components regularly. Replacing the filter in time is better to prevent such cases from happening.
- Do not put the plastic parts of this product in the dishwasher for cleaning.
- Be careful not to let the soap get into the filter as the soap will not be rinsed out.

Product Description

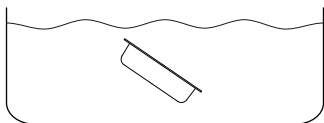

How to Install

1. Unpack and take out the main device and all parts, then clean it.

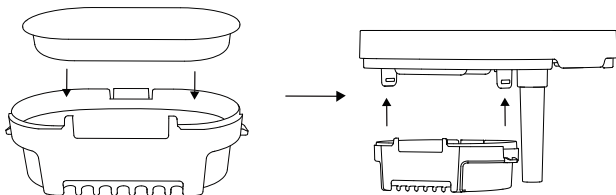

2. Soak the filter in a clean bowl for 5-10 minutes.

Note: The filter must be fully soaked before the fountain is turned on.

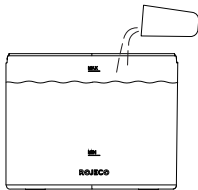

3. Place the filter into the groove of filter tray , and press to fasten it after aligning drinking tray slot.

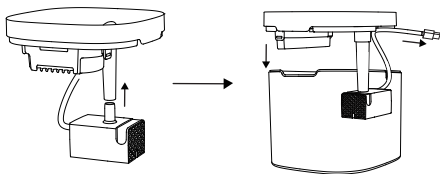

4. Add water to the tank.

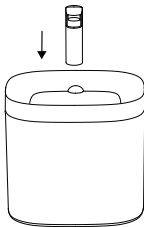

Note: Fill water into the water tank, make sure the water level is between the MAX and MIN marks.

5. Set the pump on the pipe. Press the drinking tray down along the water tank groove to fasten it, and thread the USB cable through the slot on the water tank.

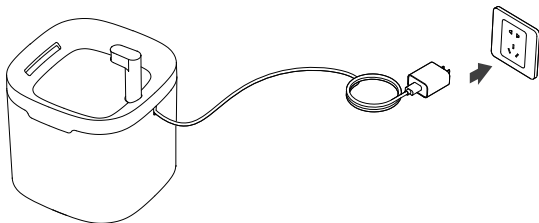

6. Spout should be inserted into the hole at the drinking tray.

7. Connect the power adapter.

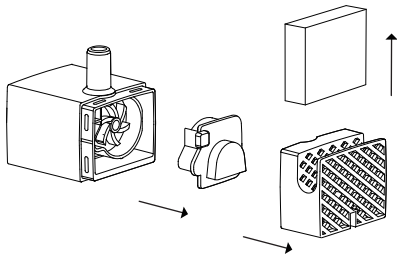

Note: Please change the water and filter cartridge regularly.

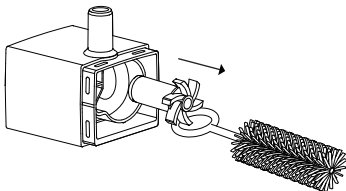

How to Clean the Pump

1. Remove the foam filter, pump cover and impeller cover in sequence.

Note: The foam filter affects the water yield very much, so please clean it frequently and replace it in time when cleaning the pump.

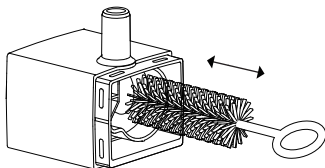

2. Remove the impeller by the brush hook.

3. Use the brush to clean the parts with water.

Tip: The brush can also be used to clean the spout. Recommended to clean the spout every 1 weeks.

Care Instruction

1. Replace the filter and the foam filter at least once every 2-4 weeks.
2. Clean the pump faucet and fountain at least once every 1 weeks.

Troubleshooting

Problem	Solution
The fountain feels slimy?	The slimy caused by your pet's saliva. More pets that use the fountain will increase the saliva content and debris in the water, so the water fountain and pump will need to clean more frequently.

Noise Level Up / Stop Working / Defective Pump / Intermittent Flowing?	1) Disassemble and clean the pump. 2) Fill water into the fountain, make sure the water level is between the MAX and MIN marks. 3) Check if the pump is aligned in place. 4) Make sure the cord does not have any frayed or exposed wires. 5) If the pump was exposed to low water levels for a prolonged period of time, the pump's motor may have burned out and the pump may need to be replaced.
The fountain is leaking?	1) The filter may not be fully soaked. Please soak the filter in the water for 5-10 minutes before the first use. 2) Check if the filter is clogged, Please clean and replace the filters in time. 3) Clean all fountain parts in water before reassembling the fountain. 4) First, look for visible cracks in the bowl. If there are no visible cracks in the bowl, place the fountain on a towel to see where the leak is. 5) Sometimes water around the fountain is caused by pets drinking. Some pets are prone to spilling.
