

User Manual

Sunnylife ND Filter DJI Avata 2 ND16

Description

The Sunnylife ND Filter DJI Avata 2 ND16 is engineered to deliver maximum performance without imposing additional load on the drone. Its ultra-lightweight construction, weighing approximately 0.7 g, ensures no impact on the gimbal's function or stabilisation. This design maintains optimal flight smoothness and precise image capture, even during dynamic FPV manoeuvres.

Use strictly in accordance with the intended purpose

For safety and certification purposes, the product must not be altered or modified in any manner. Utilisation of the product for purposes other than those specified may result in product damage. Moreover, improper usage may give rise to potential hazards.

Thoroughly read the user manual and retain it for future reference. It is essential to read and adhere to all safety instructions provided within the manual.

1. This product is not a toy. Keep it out of the reach of children and animals.
2. Protect the product from extreme temperatures, direct sunlight, strong vibrations, high humidity, moisture, flammable gases, vapours, and solvents.
3. Do not expose the product to mechanical loads.
4. If safe operation is no longer possible (the product is damaged or malfunctioning), use must be discontinued and the product prevented from further use.
5. The product must be handled with caution. Shock, impact or dropping of the product may result in damage.
6. If any doubts arise concerning operation or safety, it is imperative to consult a qualified professional.
7. Should you have any enquiries not resolved within this manual, please contact our Customer Service Department via email at hurt@innpro.pl, through our website at <https://innpro.pl/>, or consult another qualified specialist.

Specifications

Model: AT2-FI792-16

Compatible Models: Avata 2
