All product parameters provided in this manual are laboratory data, intended solely as a reference point and do not reflect the actual way of their use. Store in a place inaccessible to children, especially if it contains small elements, such as removable batteries or detachable port covers, which may pose a swallowing risk. Used electronic equipment marked in accordance with the European Union directive must not be disposed of together with other municipal waste. It is subject to selective collection and recycling at designated points. Ensuring its proper disposal prevents potential negative consequences for the environment and human health.

Environmental Protection

This document is a translation of the original user manual created by the manufacturer.

- Storage under appropriate conditions: To ensure the flashlight operates correctly for a long time, store it in a dry and cool place, away from extreme temperatures, humidity, and heat sources. Avoid storing the flashlight in places where it may be exposed to direct sunlight or high temperatures.
- Use in dark conditions: When using the flashlight in darkness or difficult conditions (e.g., during hiking, camping), pay special attention to the surroundings to avoid tripping or falling.

Product maintenance should be performed regularly (cleaning) by the user or through specialized service points at the user's cost and responsibility. In the absence of information about necessary periodic maintenance or service actions in the user manual, the condition of the physical product should be assessed regularly, at least once a week, to identify any differences from a physically new product. If any discrepancies are detected or identified, urgent maintenance (cleaning) or service steps should be taken.

Battery specifications of the product

- Battery type: Portable lithium-ion rechargeable batteries (Li-ion)

- Category: Portable battery

Safety measures

Before starting to charge, check if the device contacts are clean. Never expose the flashlight to conditions that may cause overheating of the batteries.

Detailed information on the distributor/manufacturer warranty conditions is available on the website <https://serwis.innpro.pl/gwarancja>.

Lack of proper maintenance (cleaning) and response at the time of detection of a deviation may lead to permanent damage to the product. Keep the device in a place inaccessible to children, especially if it contains small parts. Do not leave devices unattended during use and charging. Ensure that in an emergency situation you can quickly disconnect the device from the power source. Never expose devices to high temperatures. Charge the device in a dry and well-ventilated place away from flammable materials, keeping a minimum distance of 1m from other objects. Never cover the device during charging. The product meets the requirements of the so-called New Approach directives of the European Union (EU) concerning safety, health protection, and environmental protection issues. Net weight (kg) 90g.

Warning: Contains Cadmium/Lead ($>0.002\%$ Cd, $>0.004\%$ Pb). The manufacturer is not responsible for damages resulting from negligence. Risk of burns and damage: Exercise caution with bright light: Do not direct the flashlight directly into the eyes, especially at high light power, to avoid eye damage. Safety warning when in contact with hot surfaces: The outer parts of the flashlight may become hot, especially in the case of high-power LED flashlights. Always check the temperature of the flashlight before reusing it, especially after prolonged use. The device is equipped with cells that are difficult to extinguish; equip yourself with a fire blanket. Warnings and Safety Information.

Battery capacity (mAh) 4400. Power (kWh) 16.28.

Electrical safety: Use appropriate batteries: Use only batteries recommended by the flashlight manufacturer to avoid the risk of overheating. The device is equipped with a LI-ION (lithium-ion) battery, which, due to its physical and chemical structure, ages over time and with use.

explosion or damage to the device. Battery charging: Charge the batteries

- Safety warning regarding contact with hot surfaces: specifies the maximum operating time of the device under laboratory conditions, where according to the manufacturer's instructions, using the appropriate charger and never leave the flashlight unattended while charging. Do not use in damp conditions: If the flashlight is not waterproof, avoid using it in the rain or near water to prevent damage to the electrical circuits and the risk of electric shock. Warning against overheating: Flashlights, especially those with strong light sources, may heat up during prolonged use. Always check if the device is not overheated to avoid burns or material damage. Ensure that there is no moisture in the battery compartment to prevent damage. The actual operating time may differ from the declared in the offer and is not a defect of the device but a feature of the product. To maintain maximum battery life, it is not recommended to discharge it below 3.18V or 15% of the total capacity. Lower values, such as 2.5V for the cell, damage them permanently and it is not covered by warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and checked every two months for its charge level. Store the battery and device in a dry place, away from sunlight and negative temperatures. Shenzhen Supfire Prosperity Equ. Co., Ltd.

explosion or damage to the device.

- Using appropriate batteries: Only use batteries recommended by the flashlight manufacturer to avoid the risk of overheating, replace the batteries in the flashlight regularly, according to the manufacturer's instructions. Avoid using damaged or excessively worn batteries, which may affect the performance of the device and pose a risk of overheating.

- Battery charging: Charge the batteries according to the manufacturer's instructions, using the appropriate charger and never leave the flashlight unattended while charging.

- Cleaning and maintenance: Regularly check the condition of the flashlight. Use a soft cloth to clean the casing to avoid scratches and damage. Ensure that there is no moisture in the battery compartment to prevent damage. The device is equipped with a LI-PO (lithium polymer) battery, which due to its physical and chemical structure ages over time and with use.
