

Εργαστηριακός φακός Superfire GM03 – 920 lm, 7 λειτουργίες

Superfire · EAN 6975515774132

Machine translation from Polski. In case of doubt the manufacturer's original document prevails.

PORTABLE MULTIFUNCTIONAL
EMERGENCY FLASHLIGHT

USER MANUAL

Description of functions
Product structure

1

1. Before use, fully charge the flashlight. You can use mobile phone chargers, power banks, or car chargers for charging. When all indicator lights are on, it means that the flashlight is fully charged.

2. Lighting modes: Press the SWITCH button to set the working light to spot, strong, weak, or turn it off.

3. Flashing modes: Press the FLASH button once to turn on the flashing red light, press twice to turn on the flashing white and red light, press three times to turn on the flashing white light.

2

4. How to charge the lamp: Connect the Type C cable to a wall USB adapter or use a USB Type C adapter connected to a USB-C cable.

Warning
Technical specifications
Package contents

1. Before use, carefully read the instructions and fully charge the product;

2. If the lamp is not used for an extended period, it may affect the battery life. It should be charged once every 3 months, and the charging time must not be shorter than 4 hours;

3. Unfamiliar persons should not disassemble or replace any

3

elements of this light by yourself;
4. This product is not a toy; keep it out of reach of children.

- 1. Rated power: 10 W
- 2. Battery specification: 3.7 V/5200 mAh
- 3. USB-C input/output: DC5V/2A MAX
- 4. Usage time:
 - Spotlight $\geq$ 5 hours
 - High brightness $\geq$ 2.5 hours
 - Low brightness $\geq$ 8 hours

4

- Flashing/pulse flashing = 6 hours
- 5. Waterproof rating: IP55
- 6. Product dimensions: 122*115*45 mm

- 1. Emergency flashlight x 1
- 2. USB-C to Type C cable x 1
- 3. USB C to Type C adapter x 1
- 4. User manual x 1

5

This document is a translation of the original user manual created by the manufacturer. Detailed information on the distributor/manufacturer warranty conditions is available on the website https://serwis.innpro.pl/gwarancja The product should be regularly maintained (cleaned) by the user or through specialized service points at the user's cost and responsibility. In the absence of information about necessary maintenance or service actions in the user manual, the user should regularly, at least once a week, assess the physical condition of the product against that of a physically new product. If any deviation is detected or noted, urgent maintenance (cleaning) or service steps should be taken. Failure to properly maintain (clean) and respond upon detecting a deviation may lead to permanent damage to the product. The warranty does not cover damages resulting from neglect. All information regarding operation and use can be found in the user manual or on the product label. Before starting to use the product, familiarize yourself with its content and follow the instructions contained therein. Before use, also review the following information: Warnings and Safety Information Electrical safety: Using the appropriate batteries: Only use batteries recommended by the flashlight manufacturer to avoid the risk of overheating, explosion, or damage to the device. Charging batteries: Charge batteries according to the manufacturer's instructions, using the appropriate charger, and never leave the flashlight unattended while charging. Do not use in damp conditions: If the flashlight is not waterproof, avoid using it in rain or near water to prevent damage to electrical circuits and the risk of electric shock. Overheating warning: Flashlights, especially those with strong light sources, may heat up during prolonged use. Always check if the device is overheated to avoid burns or material damage. Using the appropriate batteries: Only use batteries recommended by the flashlight manufacturer to avoid the risk of overheating, explosion, or damage to the device. Charging batteries: Charge batteries according to the manufacturer's instructions, using the appropriate charger, and never leave the flashlight unattended while charging. Do not use in damp conditions: If the flashlight is not waterproof, avoid using it in rain or near water to prevent damage to electrical circuits and the risk of electric shock. Overheating warning: Flashlights, especially those with strong light sources, may heat up during prolonged use. Always check if the device is overheated to avoid burns or material damage.	User safety: Using in dark conditions: When using the flashlight in darkness or difficult conditions (e.g., during hiking, camping), pay special attention to the surroundings to avoid tripping or falling. Storing the flashlight: When the flashlight is not in use, store it in a dry and cool place to avoid damage, especially if it is powered by batteries that may overheat. Keeping away from children: The flashlight should be stored out of reach of children, especially if it contains small parts, such as replaceable batteries or removable port covers, which may pose a choking hazard. - Using in dark conditions: When using the flashlight in darkness or difficult conditions (e.g., during hiking, camping), pay special attention to the surroundings to avoid tripping or falling. Storing the flashlight: When the flashlight is not in use, store it in a dry and cool place to avoid damage, especially if it is powered by batteries that may overheat. Keeping away from children: The flashlight should be stored out of reach of children, especially if it contains small parts, such as replaceable batteries or removable port covers, which may pose a choking hazard. Risk of burns and damage: Exercise caution with bright light: Do not point the flashlight directly into the eyes, especially at high light power, to avoid eye damage. Safety warning regarding contact with hot surfaces: The external parts of the flashlight may heat up, especially in the case of high-power LED flashlights. Always check the temperature of the flashlight before reusing it, especially after prolonged use. - Exercise caution with bright light: Do not point the flashlight directly into the eyes, especially at high light power, to avoid eye damage. Safety warning regarding contact with hot surfaces: The external parts of the flashlight may heat up, especially in the case of high-power LED flashlights. Always check the temperature of the flashlight before reusing it, especially after prolonged use. Maintenance recommendations: Cleaning and maintenance: Regularly check the condition of the flashlight. Use a soft cloth to clean the casing to avoid scratches and damage. Ensure there is no moisture in the battery compartment to prevent damage. Battery replacement recommendations: Replace the batteries in the flashlight regularly, according to the manufacturer's instructions. Avoid using damaged or excessively worn batteries, which may affect the performance of the device and pose a risk of overheating.	Cleaning and maintenance: Regularly check the condition of the flashlight. Use a soft cloth to clean the casing to avoid scratches and damage. Ensure there is no moisture in the battery compartment to prevent damage. Battery replacement recommendations: Replace the batteries in the flashlight regularly, according to the manufacturer's instructions. Avoid using damaged or excessively worn batteries, which may affect the performance of the device and pose a risk of overheating. - Storing the flashlight: Storing under appropriate conditions: To ensure the flashlight operates correctly for a long time, store it in a dry and cool place, away from extreme temperatures, moisture, and heat sources. Avoid storing the flashlight in places where it may be exposed to direct sunlight or high temperatures. Storing under appropriate conditions: To ensure the flashlight operates correctly for a long time, store it in a dry and cool place, away from extreme temperatures, moisture, and heat sources. Avoid storing the flashlight in places where it may be exposed to direct sunlight or high temperatures. - Safety measures Before charging, check that the device contacts are clean. Never leave the device unattended during use and charging. Ensure that you can quickly disconnect the device from the power source in an emergency. Never expose the device to high temperatures. Charge the device in a dry and well-ventilated area away from flammable materials, keeping a minimum of 1m clearance from other objects. Never cover the device while charging. Never use a power supply, charging station, cables, etc., without the manufacturer's recommendation and certification. Take care of your property: the device is equipped with cells that are difficult to extinguish, so have a fire blanket on hand. LI-ION battery The device is equipped with a LI-ION (lithium-ion) battery, which, due to its physical and chemical structure, ages over time and with use. The manufacturer specifies the maximum operating time of the device under laboratory conditions, where optimal working conditions for the device exist, and the battery itself is new and fully charged. Actual operating time may differ from that declared in the offer and this is not a defect of the device but a feature of the product. To maintain maximum battery life, it is not recommended to discharge it below 3.18V or 15% of total capacity. Lower values, such as 2.5V for the cell, permanently damage it and this is not covered by the warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and the charge level should be checked periodically every two months. Store the battery and device in a dry place, away from sunlight and negative temperatures.														
LI-PO battery The device is equipped with a LI-PO (lithium-polymer) battery, which, due to its physical and chemical structure, ages over time and with use. The manufacturer specifies the maximum operating time of the device under laboratory conditions, where optimal working conditions for the device exist, and the battery itself is new and fully charged. Actual operating time may differ from that declared in the offer and this is not a defect of the device but a feature of the product. To maintain maximum battery life, it is not recommended to discharge it below 3.18V or 15% of total capacity. Lower values, such as 2.5V for the cell, permanently damage it and this is not covered by the warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and the charge level should be checked periodically every two months. Store the battery and device in a dry place, away from sunlight and negative temperatures. Environmental Protection  The product meets the requirements of the so-called New Approach directives of the European Union (EU) regarding issues related to user safety, health protection, and environmental protection, specifying hazards that should be detected and eliminated.
