Superfire Flashlight

TF02

User Manual

SAFETY PRECAUTIONS FOR USE

1. The product heats up in high light mode, which is a normal phenomenon.
2. Do not direct the flashlight beam directly at the eyes to avoid eye irritation caused by the strong light.
3. Before first use or after a long period of non-use, the battery should be charged.
4. To avoid damaging the flashlight, insert the battery into the flashlight in the correct direction.
5. During use, maintain the integrity of the battery casing. Damage to the battery casing may cause a short circuit, fire, or explosion.
6. If the battery is not used for an extended period, it should be charged and discharged every 3 months to keep it in good condition.

CHARGING INSTRUCTIONS

1. For micro USB/Type C charger Flashlight and headlamp
 - 1.1 Using a micro USB/Type C cable, connect the flashlight to the micro USB/Type C interface, and connect the other end to a charger, phone charger, or other USB device.
 - 1.2 The indicator lights up (flashes) red during charging or when the battery level is low, and after fully charging, it changes to blue/green.
 - 1.3 Some flashlights can serve as a power bank to charge a mobile phone or other USB devices.

2. For flashlights with batteries

Remove the battery from the flashlight and place it in the charging slot. Pay attention to the positive and negative terminals of the battery. Note: different products have different configurations and modes, please refer to the actual product.

FLASHLIGHT OPERATING INSTRUCTIONS

1. Press the button at the end or in the middle to turn the power on/off, tap to adjust modes, then press the button to switch between different modes, and press and hold for 2 seconds

in any mode to turn off.

2. Some flashlights have a zoom function; press and pull the head to adjust the size of the light spot.

Detailed information about the distributor/manufacturer warranty conditions is available on the website <https://serwis.innpro.pl/gwarancja>

The product should be regularly maintained (cleaned) by the user or by specialized service points at the user's cost and responsibility. In the absence of information about necessary periodic or service maintenance actions in the user manual, the user should regularly, at least once a week, assess the physical condition of the product against that of a physically new product. If any deviation is detected or identified, urgent maintenance (cleaning) or service steps should be taken. Failure to properly maintain (clean) and respond upon detecting a deviation may lead to permanent damage to the product. The warranty does not cover damages resulting from neglect. All information regarding operation and use can be found in the user manual or on the product label. Before starting to use the product, familiarize yourself with its content and follow the instructions contained therein. Also, review the following information before use:

Warnings and Safety Information

Electrical Safety: Using the appropriate batteries: Only use batteries recommended by the flashlight manufacturer to avoid the risk of overheating, explosion, or damage to the device.

Charging batteries: Charge batteries according to the manufacturer's instructions, using the appropriate charger, and never leave the flashlight unattended while charging. Do not use in

damp conditions: If the flashlight is not waterproof, avoid using it in the rain or near water to prevent damage to the electrical circuits and the risk of electric shock. Warning against

overheating: Flashlights, especially those with strong light sources, may heat up during prolonged use. Always check if the device is not overheated to avoid burns or material

damage. • Using the appropriate batteries: Only use batteries recommended by the flashlight manufacturer to avoid the risk of overheating, explosion, or damage to the device.

• Charging batteries: Charge batteries according to the manufacturer's instructions, using the appropriate charger, and never leave the flashlight unattended while charging. • Do not

use in damp conditions: If the flashlight is not waterproof, avoid using it in the rain or near water to prevent damage to the electrical circuits and the risk of electric shock. • Warning

against overheating: Flashlights, especially those with strong light sources, may heat up during prolonged use.

Always check if the device is not overheated to avoid burns or material damage. Safety of use: Using in dark conditions: When using the flashlight in darkness or in difficult conditions (e.g., during hiking, camping), pay special attention to the surroundings to avoid tripping or falling. Storing the flashlight: When the flashlight is not in use, store it in a dry and cool place to avoid damage, especially if it is powered by batteries that may overheat. Child safety: The flashlight should be stored in a place inaccessible to children, especially if it contains small parts, such as replaceable batteries or removable port covers, which may pose a choking hazard.

- Using in dark conditions: When using the flashlight in darkness or in difficult conditions (e.g., during hiking, camping), pay special attention to the surroundings to avoid tripping or falling.
- Storing the flashlight: When the flashlight is not in use, store it in a dry and cool place to avoid damage, especially if it is powered by batteries that may overheat.
- Child safety: The flashlight should be stored in a place inaccessible to children, especially if it contains small parts, such as replaceable batteries or removable port covers, which may pose a choking hazard.

Risk of burns and damage: Exercise caution with bright light: Do not point the flashlight directly at the eyes, especially at high light power, to avoid eye damage. Safety warning regarding contact with hot surfaces: The external parts of the flashlight may heat up, especially in the case of a high-power LED flashlight. Always check the temperature of the flashlight before reusing it, especially after prolonged use.

- Exercise caution with bright light: Do not point the flashlight directly at the eyes, especially at high light power, to avoid eye damage.
- Safety warning regarding contact with hot surfaces: The external parts of the flashlight may heat up, especially in the case of a high-power LED flashlight. Always check the temperature of the flashlight before reusing it, especially after prolonged use.

Maintenance recommendations: Cleaning and maintenance: Regularly check the condition of the flashlight. Use a soft cloth to clean the casing to avoid scratches and damage. Ensure that there is no moisture in the battery compartment to prevent damage. Recommendations for battery replacement: Replace the batteries in the flashlight regularly, according to the manufacturer's instructions. Avoid using damaged or excessively worn batteries, which may affect the device's performance and pose a risk of overheating.

- Cleaning and maintenance: Regularly check the condition of the flashlight. Use a soft cloth to clean the casing to avoid scratches and damage. Ensure that there is no moisture in the battery compartment to prevent damage.
- Recommendations for battery replacement: Replace the batteries in the flashlight regularly, according to the manufacturer's instructions. Avoid using damaged or excessively worn batteries, which may affect the device's performance and pose a risk of overheating.

Storing the flashlight: Storing under proper conditions: To ensure the flashlight operates correctly for a long time, store it in a dry and cool place, away from extreme

temperatures, moisture, and heat sources. Avoid storing the flashlight in places where it may be exposed to direct sunlight or high temperatures. • Storing under proper conditions: To ensure the flashlight operates correctly for a long time, store it in a dry and cool place, away from extreme temperatures, moisture, and heat sources. Avoid storing the flashlight in places where it may be exposed to direct sunlight or high temperatures. Safety measures Before starting to charge, check that the device's contacts are clean. Never leave the device unattended while in use and charging. Ensure that you can quickly disconnect the device from the power source in an emergency. Never expose the device to high temperatures. Charge the device in a dry and well-ventilated place away from flammable materials, keeping a minimum distance of 1m from other objects. Never cover the device while charging. Never use a power supply, charging station, cables, etc., without the manufacturer's recommendation and certification. Take care of your property; the device is equipped with cells that are difficult to extinguish, so have a fire blanket on hand. LI-ION battery The device is equipped with a LI ION (lithium-ion) battery, which, due to its physical and chemical structure, ages over time and with use.

Manufacturer

specifies the maximum operating time of the device under laboratory conditions, where optimal operating conditions for the device are present, and the battery itself is new and fully charged. The actual operating time may differ from the declared in the offer and this is not a defect of the device but a product feature. To maintain maximum battery life, it is not recommended to discharge it below 3.18V or 15% of total capacity. Lower values, such as 2.5V for the cell, permanently damage it and this is not covered by warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and its charge level should be checked periodically every two months. Store the battery and the device in a dry place, away from sunlight and negative temperatures. LI-PO Battery The device is equipped with a LI PO (lithium-polymer) battery, which, due to its physical and chemical structure, ages over time and with use. The manufacturer specifies the maximum operating time of the device under laboratory conditions, where optimal operating conditions for the device are present, and the battery itself is new and fully charged. The actual operating time may differ from the declared in the offer and this is not a defect of the device but a product feature. To maintain maximum battery life, it is not recommended to discharge it below 3.5V or 5% of total capacity. Lower values, such as 3.2V for the cell, permanently damage it and this is not covered by warranty. If the battery or the entire device is not used for more than one month, the battery should be charged to 50% and its

charge level should be checked periodically every two months. Store the battery and the device in a dry place, away from sunlight and negative temperatures. Environmental Protection

Used electronic equipment marked in accordance with the European Union directive must not be placed together with other municipal waste. It is subject to selective collection and recycling at designated points. By ensuring its proper disposal, you prevent potential negative consequences for the natural environment and human health. The system for collecting used equipment complies with locally applicable environmental protection regulations regarding waste disposal. Detailed information on this topic can be obtained at the municipal office, cleaning plant, or the store where the product was purchased. The product meets the requirements of the so-called New Approach directives of the European Union (EU) concerning issues related to user safety, health protection, and environmental protection, specifying hazards that should be detected and eliminated.
