03/Precautions for Safe Use

1. Due to the characteristics of infrared machine itself, please do not point the lens directly to the sun, cigarette butts, bonfires and other high-intensity radiation sources for a long time during use or storage.
 2. Please try to keep the device as stable as possible while in use.
 3. Please avoid hard objects touching the lens part of the product to avoid lens loss.
 4. Please do not violently disassemble the product.

05/Warranty Certificate

Warranty Card

Dear user,

1.We will offer a two-year free repair or replacement service for any device failure under normal use.

2.The term "failure under normal use" generally refers to product defects from the factory or natural wear and tear caused by the user's normal use without intentional or negligent factors, excluding failures or damages due to any improved operation, unauthorized disassembly, or violation of the Precautions for Safe Use.

3.In case of any fault of your purchased product, please return it to the Agent in time or contact our after-sales service directly.

4.The warranty would be void if the users themselves disassemble or modify the devices within the warranty period.
