Q:

A: Why does my monitor not turn on?

1. Make sure the cable you use is provided by us, or is compatible with your device and is not damaged.
2. Select the correct input source, such as HDMI, Type-C.
3. If you are using a Type-C signal source, please ensure that the Type-C port of your devices support both power and signal transmission; and make sure that the cable is

Q:

A: connected to the monitor's second Type-C port, not the first.
4. This may be caused by insufficient power supply. It is recommended to use an external power supply.

The screen flickers or goes black during use.

- 1.It is generally caused by an insufficient power supply. The monitor require high power support. Please use the original cable included to power the monitor.
2. Cable is defective or damaged.

Q: It says "no signal", what to do?

1. When connecting with a USB-C cable, make sure your device supports USB3.1./Thunderbolt 3. If not,please add a Mini HDMI to HDMI cable for signal transmission.
2. Please make sure to use the original cables.
3. Please try another device. If it still fails, please tell us for a replacement.

Q: Why does my monitor turn off when I turn up the brightness?

This is caused by insu
