Resetting the Device

Press and hold the mode button and the music rhythm button simultaneously for 5 seconds. When the device lights up blue, the factory reset will begin. If the indicator changes to a multicolor, it means the device has been successfully reset. \* Press and hold the toggle button for 5 seconds within one minute of turning on the device. \* When using the device in a new network environment, reset to factory settings before reconnecting to the network.

Accessing the Device to the Network

1. Download the Yeelight app from the mobile app store.
2. Ensure the device is powered on and reset. (Note: If the network distribution for the reset device has not been completed, the device will automatically close the network distribution window, which will reopen after power cycling or resetting the device).
3. Open the app and follow the instructions in the app to scan the Matter QR code on the cover of the manual or on the product control panel, or enter the reset code under the Matter QR code to complete the network access operation.

User Instructions

Button Instructions for Light:

Press: Holding for 2 seconds will exit the music rhythm mode.

Press: Turn on/off

Lighting Mode

Holding: Turn off after 2 seconds

Basic Parameters

Product Model: YLFWD-0062

Rated Power: 10 W (100 x 0.1 W / LED module)

Rated Input: DC 5V 2A

Wireless Connection: WiFi IEEE 802.11 b/g/n 2.4 GHz, Bluetooth 5.0BLE

#### Warning

- For indoor use only.
- Do not remove or disassemble the product.
- Do not combine parts of this product with parts from other manufacturers.
- To avoid premature damage to the product, use it only in environments with a temperature range of 14 to 77 °F (-10 to 25 °C).
- The product is not waterproof and extra caution is required during installation and use.
- The light source of this lamp is not replaceable; once the light source has reached the end of its life, the entire lamp must be replaced.
- Under normal usage conditions, the distance between the antenna and the user's body should be at least 20 cm.
- This product is not suitable for general interior lighting and can only be used for decorative purposes.

#### SIMPLIFIED EU DECLARATION OF CONFORMITY

Qingdao Yeemi Innovation Information Technology Co., Ltd. hereby declares that the radio equipment of type [Yeelight Cube Lite] is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following address:

<https://files.innpro.pl/yeelight>. Manufacturer's address: Keyuanwei One Road, Building B, 266100 Qingdao, China

Radio Frequency: 2400-2483.5 MHz Maximum radio frequency power: ≤20 dBm

#### Warnings and Safety Information

All information on product usage can be found in the user manual. Please read this manual before use and follow the instructions provided. Also, thoroughly read the following information before use:

##### Usage Warning – Risk of Product Damage:

- Do not drop the lamp or expose it to strong impacts to avoid damaging the LEDs, casing, or other components.
- Use only original chargers and cables provided by the manufacturer (applicable for lamps with built-in batteries). Using incompatible accessories may lead to overheating or short-circuiting.
- Do not use lamps in areas with high humidity unless marked as waterproof.

#### Risks Associated with Lighting:

- Do not look directly into the light source to avoid damaging your eyesight.
- When using lamps with RGB function or adjustable color temperature, ensure the light is not too intense, especially near children.

#### Risk of Overheating:

- Do not cover the lamp during use to prevent overheating.
- Place the unit on a stable surface that does not restrict airflow around the lamp.

#### Danger to Children:

- Keep lamps with small parts (e.g., clips, switches) out of reach of children to prevent choking hazards.
- Keep products with built-in batteries or cables out of reach of children.

#### Environmental Hazard:

- Dispose of table lamps, monitor lamps, and other lighting items containing electronic components at an electronic waste collection point. Proper disposal allows for the recovery of raw materials and prevents environmental pollution.

#### Information on Proper Use

##### Usage Recommendations:

- Before first use, charge the light with a built-in battery to full capacity according to the manufacturer's instructions.
- Adjust the brightness and color temperature of the light according to your needs to avoid eye strain while working or reading.
- Clip-on table lamps should be secured to a stable surface to prevent them from tipping over.
- Regularly check the condition of cables and charging ports for any mechanical damage.

##### Maintenance and storage:

- Clean the lamps with a dry soft cloth. Do not use chemicals that could damage the surface.
- Store the lights in a dry place, away from direct sunlight, which can cause fading of the cover or damage to the LEDs.
- For lights with built-in batteries that are not used for an extended period, recharge them regularly every few months to prevent battery degradation. Additional safety measures and user customization:
- Choose a suitable lamp according to your needs – for example, models with adjustable light intensity and color temperature for office work or RGB lights to create a cozy atmosphere.

- When working with a computer, monitor lamps are recommended, which reduce glare and thus alleviate eye strain. Damage and service:
- In case of visible damage, such as cracks in the cover, damaged cables, or unstable connection to the charger, stop using the device and contact the manufacturer.
- Do not attempt to repair the lamp yourself – all repairs should be carried out exclusively by an authorized service center of the manufacturer. Declaration of conformity

The products are designed in accordance with applicable safety standards, including compliance with Regulation (EU) 2023/988. They meet the relevant technical standards, including electromagnetic compatibility, electrical safety, and protection of the user from mechanical and environmental risks. Environmental protection

Electronic waste marked in accordance with the European Union directive must not be disposed of together with other municipal waste. It is subject to separate collection and recycling at designated locations. By ensuring its proper disposal, you will prevent possible negative consequences for the environment and human health. The used device collection system complies with local environmental protection regulations for waste disposal. Detailed information on this topic can be obtained at the municipal office, at the cleaning station, or at the store where you purchased the product. The product meets the requirements of the so-called New Approach directives of the European Union (EU), which deal with operational safety, health and environmental protection, and specify the risks that need to be identified and eliminated. This document is a translation of the original user manual prepared by the manufacturer. The product needs to be regularly maintained (cleaned) by the user or a specialized service center at the user's expense. If the user manual does not provide information on necessary regular maintenance or service interventions, it is necessary to assess at least once a week the deviation of the physical condition of the product from that of a new product. If any deviation is detected or appears, maintenance (cleaning) or service action must be carried out immediately. If proper maintenance (cleaning) is not performed and no action is taken in response to the identified different condition, permanent damage to the product may occur. The manufacturer is not responsible for damages resulting from negligence. Manufacturer:
