This document is a translation of the original instruction manual created by the manufacturer.

Detailed information on the distributor's / manufacturer's warranty terms and conditions is available at website <https://serwis.innpro.pl/gwarancja>

The product must be regularly maintained (cleaned) by the user himself or by specialised service centres at the user's expense and expense. In the absence of information on necessary cyclical maintenance or service actions in the operating instructions, the deviation of the physical condition of the product from a physically new product must be assessed regularly, at least once a week. If any discrepancy is detected or found, maintenance (cleaning) or service measures must be taken urgently. Failure to properly maintain (clean) and react when a dissimilar condition is detected may result in permanent damage to the product. The guarantor is not liable for damage resulting from negligence.

### Warnings and safety information

All information regarding the use of the product can be found in the user manual. Before using it, read its contents and follow the instructions contained therein.

Also read the following information before use:

#### Warnings for use

##### Hazard to children:

- The product is not intended for children and is not intended for play.
- The controls may contain small parts that pose a choking hazard.
- Keep the device out of the reach of children and ensure that they do not have access to any small parts.

##### Risk of electric shock:

- Control devices connected to the power supply should be installed by a qualified professional in accordance with the operating instructions.
- Ensure that the unit is disconnected from the power source before installation or maintenance.
- Use only original or manufacturer-recommended power supplies, cables and other components.
- Do not handle the equipment with wet hands to avoid electric shock.

##### Risk of damage to the equipment:

- Avoid installing the controls in areas exposed to moisture, extreme temperatures or direct sunlight unless they are rated for such conditions.
- Do not attempt to open or modify the control devices yourself to avoid damaging electronic components and voiding the warranty.
- Do not expose the devices to impacts, falls, strong shocks or other factors that may damage them.

##### Risk of misuse:

- Ensure that the control devices are used in accordance with their intended use and the manufacturer's recommendations.
- If the devices are integrated into a smart home system, ensure that they are correctly configured in the control application to avoid operating errors.
- For devices with built-in buttons, avoid excessive pressure that could damage the internal mechanisms.

## Wireless connectivity

### Data protection:

- Control devices often use Wi-Fi, Zigbee, Bluetooth or other communication technologies. Secure them with a password and, if possible, enable connection encryption to prevent unauthorised access.
- Regularly update the software of devices and associated control applications to protect data from unauthorised access.
- Avoid using public Wi-Fi networks to manage control devices to increase data security.

### Access management:

- Restrict access to applications and control devices to trusted users only.
- Regularly review the list of devices connected to the system and remove those that are no longer in use or may pose a potential threat.
- For devices with remote control functionality, use the notification function for unauthorised access attempts where possible.

### Information on correct use

#### Installation and configuration:

- Before installation, ensure that the control device is compatible with the system in which it is to operate and with other devices in the smart home network.
- If the device needs to be installed in a wall, make sure the installation location is dry, safe and in accordance with the operating instructions.
- Check that the devices are mounted in a location that provides a stable connection to the network.

#### Maintenance and cleaning:

- Regularly check the control devices for visible damage, such as cracks in the housing, damaged wires or dirty contacts.
- Clean the devices with a soft, dry cloth. Do not use water or chemicals that may damage their electronics.
- For battery-powered devices, regularly check the condition of the batteries and replace them according to the manufacturer's recommendations.
- For battery-powered devices, regularly check the charge level and charge them according to the manufacturer's recommendations.

#### Safety of use:

- If the device operates unstably (e.g. flashing indicators, unresponsive to commands), immediately disconnect it from the power supply and contact the manufacturer or service centre.

### Additional precautions

#### Service and repair:

- If you have any problems with the unit, contact an authorised service centre.
- Do not attempt to repair the controls yourself to avoid further damage or loss of warranty.

#### Safe disposal:

- Dispose of used devices in accordance with local electronic waste regulations.
- Do not dispose of the device in municipal waste - take it to an electronics collection point.

If you require any further information about the product, please contact customer service (e-mail: [hurt@innpro.pl](mailto:hurt@innpro.pl), website: <https://innpro.pl/>) or any other specialist.

## EU DECLARATION OF COMPLIANCE PROVIDED

Qingdao Yeemi Innovation Information Technology Co., Ltd. hereby declares that the type of radio equipment YEELIGHT Bedside D1 Matter Smart Night Light is in conformity with Directive 2014/53/EU. The full text of the EU Declaration of Conformity is available at the following web address: <https://files.innpro.pl/yeelight>

Manufacturer address: Keyuanwei One Road Building B 266100 Qingdao, cn

Radio frequency: 2.4Ghz (2400Mhz - 2483.5Mhz)

Maximum radio frequency power: <20dBm

### Environmental protection

Electronic waste labelled in accordance with the European Union directive must not be placed together with other municipal waste. It is subject to separate collection and recycling at designated points. By ensuring that it is disposed of correctly, you will prevent potential negative consequences for the environment and human health. The collection system for used equipment complies with local environmental regulations for waste disposal. You can obtain detailed information on this subject from your municipality, your purification plant or the shop where you purchased the product.

The product complies with the requirements of the so-called New Approach Directives of the European Union (EU), which deal with issues relating to safety of use, health protection and environmental protection, specifying the hazards that should be detected and eliminated.
